## CHAPTER 36

# HAZARDOUS SUBSTANCE SPILLS

36.01 Purpose

36.02 Definitions

36.03 Cleanup Required

36.04 Liability for Cleanup Costs

36.05 Notifications

36.06 Police Authority

36.07 Liability

**36.01 PURPOSE.** In order to reduce the danger to the public health, safety and welfare from the leaks and spills of hazardous substances, these regulations are promulgated to establish responsibility for the treatment, removal and cleanup of hazardous substance spills within the City limits.

**36.02 DEFINITIONS.** For purposes of this chapter the following terms are defined:

1. “Cleanup” means actions necessary to contain, collect, control, identify, analyze, clean up, treat, disperse, remove or dispose of a hazardous substance.

*(Code of Iowa, Sec. 455B.381[1])*

2. “Hazardous condition” means any situation involving the actual, imminent or probable spillage, leakage, or release of a hazardous substance onto the land, into a water of the State or into the atmosphere which creates an immediate or potential danger to the public health or safety or to the environment.

*(Code of Iowa, Sec. 455B.381[4])*

3. “Hazardous substance” means any substance or mixture of substances that presents a danger to the public health or safety and includes, but is not limited to, a substance that is toxic, corrosive, or flammable, or that is an irritant or that generates pressure through decomposition, heat, or other means. “Hazardous substance” may include any hazardous waste identified or listed by the administrator of the United States Environmental Protection Agency under the Solid Waste Disposal Act as amended by the Resource Conservation and Recovery Act of 1976, or any toxic pollutant listed under section 307 of the Federal Water Pollution Control Act as amended to January 1, 1977, or any hazardous substance designated under Section 311 of the Federal Water Pollution Control Act as amended to January 1, 1977, or any hazardous material designated by the Secretary of Transportation under the Hazardous Materials Transportation Act.

*(Code of Iowa, Sec. 455B.381[5])*

4. “Responsible person” means a person who at any time produces, handles, stores, uses, transports, refines, or disposes of a hazardous substance, the release of which creates a hazardous condition, including bailees, carriers, and any other person in control of a hazardous substance when a hazardous condition occurs, whether the person owns the hazardous substance or is operating under a lease, contract, or other agreement with the legal owner of the hazardous substance.

*(Code of Iowa, Sec. 455B.381[7])*

**36.03 CLEANUP REQUIRED.** Whenever a hazardous condition is created by the deposit, injection, dumping, spilling, leaking or placing of a hazardous substance, so that the hazardous substance or a constituent of the hazardous substance may enter the environment or be emitted into the air or discharged into any waters, including ground waters, the responsible person shall cause the condition to be remedied by a cleanup, as defined in the preceding section, as rapidly as feasible to an acceptable, safe condition. The costs of cleanup shall be borne by the responsible person. If the responsible person does not cause the cleanup to begin in a reasonable time in relation to the hazard and circumstances of the incident, the City may, by an authorized officer, give reasonable notice, based on the character of the hazardous condition, said notice setting a deadline for accomplishing the cleanup and stating that the City will proceed to procure cleanup services and bill the responsible person for all costs associated with the cleanup if the cleanup is not accomplished within the deadline. In the event that it is determined that immediate cleanup is necessary as a result of the present danger to the public health, safety and welfare, then no notice shall be required and the City may proceed to procure the cleanup and bill the responsible person for all costs associated with the cleanup. If the bill for those services is not paid within thirty (30) days, the City Attorney shall proceed to obtain payment by all legal means. If the cost of the cleanup is beyond the capacity of the City to finance it, the authorized officer shall report to the Council and immediately seek any State or Federal funds available for said cleanup.

**36.04 LIABILITY FOR CLEANUP COSTS.** The responsible person shall be strictly liable to the City for all of the following:

1. The reasonable cleanup costs incurred by the City or the agents of the City as a result of the failure of the responsible person to clean up a hazardous substance involved in a hazardous condition.
2. The reasonable costs incurred by the City or the agents of the City to evacuate people from the area threatened by a hazardous condition caused by the person.

3. The reasonable damages to the City for the injury to, destruction of, or loss of City property, including parks and roads, resulting from a hazardous condition caused by that person, including the costs of assessing the injury, destruction or loss.

4. The excessive and extraordinary cost incurred by the City or the agents of the City in responding at and to the scene of a hazardous condition caused by that person.

A person manufacturing, storing, handling, transporting, or disposing of a hazardous substance shall notify the State Department of Natural Resources and the Police Chief of the occurrence of a hazardous condition as soon as possible but not later than six (6) hours after the onset of the hazardous condition or discovery of the hazardous condition. The Police Chief shall immediately notify the Department of Natural Resources.

2. Any other person who discovers a hazardous condition shall notify the Police Chief, which shall then notify the Department of Natural Resources.

**36.06 POLICE AUTHORITY.** If the circumstances reasonably so require, the law enforcement officer or an authorized representative may:

1. Evacuate persons from their homes to areas away from the site of a hazardous condition, and

No person shall disobey an order of any law enforcement officer issued under this section.

Notice shall be deemed given when mailed. The notice shall describe the year, make, model and vehicle identification number of the vehicle, describe the personal property found in the vehicle, set forth the location of the facility where the vehicle is being held, and inform the persons receiving the notice of their right to reclaim the vehicle and personal property within ten (10) days after the effective date of the notice upon payment of all towing, preservation, and storage charges resulting from placing the vehicle in custody and upon payment of the costs of the notice. The notice shall also state that the failure of the owner, lienholders or claimants to exercise their right to reclaim the vehicle or personal property within the time provided shall be deemed a waiver by the owner, lienholders and claimants of all right, title, claim and interest in the vehicle or personal property and that failure to reclaim the vehicle or personal property is deemed consent to the sale of the vehicle at a public auction or disposal of the vehicle to a demolisher and to disposal of the personal property by sale or destruction. If the abandoned vehicle was taken into custody by a private entity without a police authority's initiative, the notice shall state that the private entity may claim a garage keeper's lien as described in Section 321.90 of the Code of

Iowa, and may proceed to sell or dispose of the vehicle. If the abandoned vehicle was taken into custody by a police authority or by a private entity hired by a police authority, the notice shall state that any person claiming rightful possession of the vehicle or personal property who disputes the planned disposition of the vehicle or property by the police authority or private entity or of the assessment of fees and charges provided by this section may ask for an evidentiary hearing before the police authority to contest those matters. If the persons receiving notice do not ask for a hearing or exercise their right to reclaim the vehicle or personal property within the ten-day reclaiming period, the owner, lienholders or claimants shall no longer have any right, title, claim, or interest in or to the vehicle or the personal property. A court in any case in law or equity shall not recognize any right, title, claim, or interest of the owner, lienholders or claimants after the expiration of the ten-day reclaiming period.

*(Ord. 228 – Oct. 09 Supp.)*

*(Code of Iowa, Sec. 321.89[3a])*

**80.04 NOTIFICATION IN NEWSPAPER.** If it is impossible to determine with reasonable certainty the identity and addresses of the last registered owner and all lienholders, notice by one publication in one newspaper of general circulation in the area where the vehicle was abandoned shall be sufficient to meet all requirements of notice under Section 80.03. The published notice may contain multiple listings of abandoned vehicles and personal property but shall be published within the same time requirements and contain the same information as prescribed for mailed notice in Section 80.03.

*(Code of Iowa, Sec. 321.89[3b])*

**80.05 FEES FOR IMPOUNDMENT.** The owner, lienholder or claimant shall pay five dollars (\$5.00) if claimed within five (5) days of impounding, plus one dollar (\$1.00) for each additional day within the reclaiming period plus towing charges if stored by the City, or towing and storage fees, if stored in a public garage, whereupon said vehicle shall be released. The amount of towing charges, and the rate of storage charges by privately owned garages, shall be established by such facility.

*(Code of Iowa, Sec. 321.89[3a])*

abandoned motor vehicle, or any person being the owner of a motor vehicle whose title certificate is faulty, lost or destroyed, may dispose of such motor vehicle to a demolisher for junk, without a title and without notification procedures, if such motor vehicle lacks an engine or two (2) or more wheels or other structural part which renders the vehicle totally inoperable. The police authority shall give the applicant a certificate of authority. The applicant shall then apply to the County Treasurer for a junking certificate and shall surrender the certificate of authority in lieu of the certificate of title.

*(Code of Iowa, Sec. 321.90[2e])*

**80.08 PROCEEDS FROM SALES.** Proceeds from the sale of any abandoned vehicle shall be applied to the expense of auction, cost of towing, preserving, storing and notification required, in accordance with State law. Any balance shall be held for the owner of the motor vehicle or entitled lienholder for ninety (90) days, and then shall be deposited in the State Road Use Tax Fund. Where the sale of any vehicle fails to realize the amount necessary to meet costs the police authority shall apply for reimbursement from the Department of Transportation.

*(Code of Iowa, Sec. 321.89[4])*

**80.09 DUTIES OF DEMOLISHER.** Any demolisher who purchases or otherwise acquires an abandoned motor vehicle for junk shall junk, scrap, wreck, dismantle or otherwise demolish such motor vehicle. Where one service pipe supplies more than one customer within the building, there shall be separate valves for each such customer so that service may be shut off for one without interfering with service to the others.

**90.16 INSPECTION AND APPROVAL.** All water service pipes and their connections to the water system must be inspected and approved in writing by the Superintendent before they are covered, and the Superintendent shall keep a record of such approvals. If the Superintendent refuses to approve the work, the plumber or property owner must proceed immediately to correct the work. Every person who uses or intends to use the municipal water system shall permit the Superintendent to enter the premises to inspect or make necessary alterations or repairs at all reasonable hours and on proof of authority.

**90.17 COMPLETION BY THE CITY.** Should any excavation be left open or only partly refilled for twenty-four (24) hours after the water service pipe is installed and connected with the water system, or should the work be improperly done, the Superintendent shall have the right to finish or correct the work, and the Council shall assess the costs to the property owner or the plumber. If the plumber is assessed, the plumber must pay the costs before receiving another permit. If the property owner is assessed, such assessment may be collected with and in the same manner as general property taxes.

*(Code of Iowa, Sec. 364.12[3a & h])*

**90.18 SHUTTING OFF WATER SUPPLY.** The Superintendent may shut off the supply of water to any customer because of any violation of the regulations contained in these Water Service System chapters that is not being contested in good faith. **90.19 OPERATION OF CURB VALVE AND HYDRANTS.** It is unlawful for any person except the Superintendent to turn water on at the curb valve, and no person, unless specifically authorized by the City, shall open or attempt to draw water from any fire hydrant for any purpose whatsoever.

- 2. Watering or irrigation of flower and vegetable gardens, trees and shrubs less than four (4) years old and new seedling or sod is permitted once per week with an application not to exceed one (1) inch.
- 3. Car washing is prohibited except in commercial establishments that provide that service.
- 4. No water shall be used to fill private swimming pools, children's wading pools, reflecting pools or any other outdoor pool or pond.

5. No water shall be used to wash streets, parking lots, driveways, sidewalks or building exteriors.
6. No water shall be used for nonessential cleaning of commercial and industrial equipment, machinery and interior spaces.
7. Water shall be served in restaurants only upon the request of the customer.
8. Use of water-consuming air conditioning equipment which consumes in excess of five percent (5%) of the water circulating in such equipment is prohibited.
9. Tankload water sales may be curtailed or eliminated.

Water reclaimed or recycled after some other primary use, such as water that has been used for washing or cooling, may be used without restriction. Additionally, water derived from sources other than the City water utility, such as water condensed from the atmosphere by air conditioners or collected from rain or snow, may be used without restriction.

**93.05 WATER EMERGENCY.** Under a Water Emergency, Water Warning use restrictions shall be in effect and, in addition, each customer will be afforded a quarterly allocation of water.

**93.06 PENALTIES.** The following penalties shall apply for violation of Water Warning or Water Emergency use restrictions imposed under this chapter.

1. **First Violation.** For a first violation, the utility shall issue a written notice of violation to the water user violating the water use restrictions imposed during a Water Warning or Water Emergency.
2. **Second Violation.** For a second violation within a 12-month period, a surcharge shall be imposed in an amount equal to 25 percent of the previous water bill.
3. **Subsequent Violations.** For any subsequent violation within a 12-month period, a surcharge shall be imposed in an amount equal to 25 percent of the previous bill, and in addition, the utility shall interrupt water service to that customer at the premises at which the violation occurred. Service shall not be restored until the customer has paid the reconnection fee and has provided reasonable assurance that future violation of Water Warning or Water Emergency use restrictions will not occur.

Any customer charged with a violation of the Water Warning or Water Emergency use restrictions may request a hearing before the Water Appeal

Board. The Water Appeal Board may conclude that a violation did not occur or that the circumstances under which the violation occurred warrant a complete or partial mitigation of the penalty.

**93.07 BASE ALLOCATION.** The base allocation of water for residential use shall be 85% per household per billing period. For commercial, industrial or institutional use, the base allocation shall be established by resolution as a percentage of the average water used during the same billing period of the previous year.

**93.08 APPEAL AND ADJUSTMENT OF THE BASE ALLOCATION.** Any person may file an appeal with the Water Appeal Board to adjust the base allocation amount. The Water Appeal Board may grant an adjustment to the appellant based upon the following criteria:

1. For single-family residential use, the base allocation may be increased by 1,000 gallons per person per month for all individuals residing at the appellant's residence for a period of more than thirty (30) days.
2. For commercial, industrial, institutional or other residential uses, the base allocation may be increased based on factors appropriate to the individual customer; such as usage, production, service and occupancy data provided by the customer.

**93.09 PREMIUM RATE FOR IMPRUDENT CONSUMPTION.** In addition to the water rates duly enacted by the Council, all persons shall pay a premium rate of \$1.00 per 100 gallons of water consumed in excess of the base allocation.

**93.10 ADJUSTMENT OF PREMIUM RATE CHARGES.** Any person may file for adjustment of the premium rate charges for imprudent water consumption with the Water Appeal Board. The Water Appeal Board may grant an adjustment of the premium rate charges in accordance with the following criteria:

1. Adjustments may be granted for over-consumption due to mechanical failures such as broken or leaky water pipes or fixtures but not for over-consumption due to human carelessness.
2. The applicant shall furnish proof that the mechanical failure was repaired promptly. This should be in the form of a plumber's invoice or statement or a materials receipt.
3. The adjustment shall be granted only for the billing period prior to the correction of the failure.

4. For those accounts granted an adjustment of the premium rate charges, the minimum adjusted rate shall be forty percent (40%) of the actual bill which shall include the premium rate charges and sales tax.

**93.11 WATER APPEAL BOARD.** A Water Appeal Board shall be appointed during any Water Warning or Water Emergency. The Water Appeal Board shall consist of the Mayor, the Superintendent and three representatives of the community who shall be appointed by the Mayor with the approval of the Council. The Water Appeal Board shall hear appeals of any action taken pursuant to a Water Warning or Water Emergency, except that, if a customer is charged with a municipal infraction relating to this chapter, that proceeding shall be conducted pursuant to Section 364.22 of the Code of Iowa.

**93.12 MUNICIPAL INFRACTION.** A second or subsequent violation of the Water Warning or Water Emergency use restrictions by any person within a 12-month period constitutes a municipal infraction. Any person who, in making application to the Water Appeal Board for adjustments of the base allocation or premium charges, intentionally provides false or incorrect statement or information commits a municipal infraction.

**93.13 REDUCTION IN FLOW OF WATER TO ANY PERSON.** The Superintendent is authorized, after giving notice and opportunity for hearing before the Water Appeal Board, to reduce the flow of water to any person determined to be using water in any manner not in accordance with this chapter during a Water Warning or Water Emergency.

## CHAPTER 96

### BUILDING SEWERS AND CONNECTIONS

96.01 Permit  
96.02 Permit Fee and Connection Charge  
96.03 Plumber Required  
96.04 Excavations  
96.05 Connection Requirements

96.06 Interceptors Required  
96.07 Sewer Tap  
96.08 Inspection Required  
96.09 Property Owner's Responsibility  
96.10 Abatement of Violations

**96.01 PERMIT.** No unauthorized person shall uncover, make any connection with or opening into, use, alter or disturb any public sewer or appurtenance thereof without first obtaining a written permit from the City. The application for the permit shall set forth the location and description of the property to be connected with the sewer system and the purpose for which the sewer is to be used, and shall be supplemented by any plans, specifications, or other information considered pertinent. The permit shall require the owner to complete construction and connection of the building sewer to the public sewer within thirty (30) days after the issuance of the permit, except that when a property owner makes sufficient showing that due to conditions beyond the owner's control or peculiar hardship, such time period is inequitable or unfair, an extension of time within which to comply with the provisions herein may be granted. Any sewer connection permit may be revoked at any time for a violation of these chapters.

**96.02 PERMIT FEE AND CONNECTION CHARGE.** The person who makes the application shall pay a fee in the amount of twenty-five dollars (\$25.00) to the Clerk to cover the cost of issuing the permit and supervising, regulating, and inspecting the work. In addition, there shall be a connection charge in the amount of one hundred seventy-five dollars (\$175.00) for residential property, or three hundred fifty dollars (\$350.00) for commercial and industrial property, paid to reimburse the City for costs borne by the City in making sewer service available to the property served.

**96.03 PLUMBER REQUIRED.** All installations of building sewers and connections to the public sewer shall be made by a plumber approved by the City. The Superintendent shall have the power to suspend the approval of any plumber for violation of any of the provisions of these Sanitary Sewer chapters; a suspension, unless revoked, shall continue until the next regular meeting of the Council. The Superintendent shall notify the plumber immediately by personal written notice of the suspension, the reasons for the suspension, and the time and place of the Council meeting at which the plumber will be granted a hearing. At this Council meeting the Superintendent shall make a written report to the Council stating the reasons for the suspension, and the Council,

after fair hearing, shall affirm or revoke the suspension or take any further action that is necessary and proper.

**96.04 EXCAVATIONS.** All excavations required for the installation of a building sewer shall be open trench work unless otherwise approved by the City. Pipe laying and backfill shall be performed in accordance with A.S.T.M. Specification C-12, except that no backfill shall be placed until the work has been inspected. The excavations shall be made in accordance with the provisions of Chapter 135 where applicable.

**96.05 CONNECTION REQUIREMENTS.** Any connection with a public sanitary sewer must be made under the direct supervision of the Superintendent and in accordance with the following:

1. Old Building Sewers. Old building sewers may be used in connection with new buildings only when they are found, on examination and test conducted by the owner and observed by the Superintendent, to meet all requirements of this chapter.
2. Separate Building Sewers. A separate and independent building sewer shall be provided for every occupied building; except where one building stands at the rear of another on an interior lot and no private sewer is available or can be constructed to the rear building through an adjoining alley, court, yard, or driveway. In such cases the building sewer from the front building may be extended to the rear building and the whole considered as one building sewer.
3. Installation. The installation and connection of the building sewer to the public sewer shall conform to the requirements of the State Plumbing Code, applicable rules and regulations of the City, or the procedures set forth in A.S.T.M. Specification C-12. All such connections shall be made gastight and watertight. Any deviation from the prescribed procedures and materials must be approved by the Superintendent before installation.
4. Water Lines. When possible, building sewers should be laid at least ten (10) feet horizontally from a water service. The horizontal separation may be less, provided the water service line is located at one side and at least twelve (12) inches above the top of the building sewer.
5. Size. Building sewers shall be sized for the peak expected sewage flow from the building with a minimum building sewer size of four (4) inches.
6. Alignment and Grade. All building sewers shall be laid to a straight line to meet the following:

- A. Recommended grade at one-fourth ( $\frac{1}{4}$ ) inch per foot.
  - B. Minimum grade of one-eighth ( $\frac{1}{8}$ ) inch per foot.
  - C. Minimum velocity of 2.00 feet per second with the sewer half full.
  - D. Any deviation in alignment or grade shall be made only with the written approval of the Superintendent and shall be made only with approved fittings.
7. Depth. Whenever possible, the building sewer shall be brought to the building at an elevation below the basement floor. The depth of cover above the sewer shall be sufficient to afford protection from frost.
8. Sewage Lifts. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by such drain shall be lifted by approved artificial means and discharged to the building sewer.
9. Pipe Specifications. Building sewer pipe shall be free from flaws, splits, or breaks. Materials shall be as specified in the State Plumbing Code except that the building sewer pipe, from the property line to the public sewer, shall comply with the current edition of one of the following:
- A. Clay sewer pipe - A.S.T.M. C-700 (extra strength).
  - B. Extra heavy cast iron soil pipe - A.S.T.M. A-74.
  - C. Ductile iron water pipe - A.W.W.A. C-151.
  - D. P.V.C. - SDR26 - A.S.T.M. D-3034
10. Bearing Walls. No building sewer shall be laid parallel to, or within three (3) feet of any bearing wall, which might thereby be weakened.
11. Jointing. Fittings, type of joint, and jointing material shall be compatible with the type of pipe used, subject to the approval of the Superintendent. Solvent-welded joints are not permitted.
12. Unstable Soil. No sewer connection shall be laid so that it is exposed when crossing any watercourse. Where an old watercourse must of necessity be crossed or where there is any danger of undermining or settlement, cast iron soil pipe or vitrified clay sewer pipe thoroughly encased in concrete shall be required for such crossings. Such encasement shall extend at least six (6) inches on all sides of the pipe. The cast iron pipe or encased clay pipe shall rest on firm, solid material at either end.

13. Preparation of Basement or Crawl Space. No connection for any residence, business or other structure with any sanitary sewer shall be made unless the basement floor is poured, or in the case of a building with a slab or crawl space, unless the ground floor is installed with the area adjacent to the foundation of such building cleared of debris and backfilled. The backfill shall be well compacted and graded so that the drainage is away from the foundation. Prior to the time the basement floor is poured, or the first floor is installed in buildings without basements, the sewer shall be plugged and the plug shall be sealed by the Superintendent. Any accumulation of water in any excavation or basement during construction and prior to connection to the sanitary sewer shall be removed by means other than draining into the sanitary sewer.

**96.06 INTERCEPTORS REQUIRED.** Grease, oil, sludge and sand interceptors shall be provided by gas and service stations, convenience stores, car washes, garages, and other facilities when, in the opinion of the Superintendent, they are necessary for the proper handling of such wastes that contain grease in excessive amounts or any flammable waste, sand or other harmful ingredients. Such interceptors shall not be required for private living quarters or dwelling units. When required, such interceptors shall be installed in accordance with the following:

1. Design and Location. All interceptors shall be of a type and capacity as specified in the State Plumbing Code, to be approved by the Superintendent, and shall be located so as to be readily and easily accessible for cleaning and inspection.
2. Construction Standards. The interceptors shall be constructed of impervious material capable of withstanding abrupt and extreme changes in temperature. They shall be of substantial construction, watertight and equipped with easily removable covers that shall be gastight and watertight.
3. Maintenance. All such interceptors shall be maintained by the owner at the owner's expense and shall be kept in continuously efficient operations at all times.

**96.07 SEWER TAP.** Connection of the building sewer into the public sewer shall be made at the "Y" branch, if such branch is available at a suitable location. If no properly located "Y" branch is available, a "Y" saddle shall be installed at the location specified by the Superintendent. The public sewer shall be tapped with a tapping machine and a saddle appropriate to the type of public sewer shall be glued and attached with stainless steel clamps to the sewer. At no time shall a building sewer be constructed so as to enter a manhole unless

special written permission is received from the Superintendent and in accordance with the Superintendent's direction if such connection is approved.

**96.08 INSPECTION REQUIRED.** All connections with the sanitary sewer system before being covered shall be inspected and approved, in writing, by the Superintendent. As soon as all pipe work from the public sewer to inside the building has been completed, and before any backfilling is done, the Superintendent shall be notified and the Superintendent shall inspect and test the work as to workmanship and material; no sewer pipe laid under ground shall be covered or trenches filled until after the sewer has been so inspected and approved. If the Superintendent refuses to approve the work, the plumber or owner must proceed immediately to correct the work.

**96.09 PROPERTY OWNER'S RESPONSIBILITY.** All costs and expenses incident to the installation, connection and maintenance of the building sewer shall be borne by the owner. The owner shall indemnify the City from any loss or damage that may directly or indirectly be occasioned by the installation of the building sewer.

**96.10 ABATEMENT OF VIOLATIONS.** Construction or maintenance of building sewer lines whether located upon the private property of any owner or in the public right-of-way, which construction or maintenance is in violation of any of the requirements of this chapter, shall be corrected, at the owner's expense, within thirty (30) days after date of official notice from the Council of such violation. If not made within such time the Council shall, in addition to the other penalties herein provided, have the right to finish and correct the work and assess the cost thereof to the property owner. Such assessment shall be collected with and in the same manner as general property taxes.

## CHAPTER 97

### USE OF PUBLIC SEWERS

97.01 Storm Water  
97.02 Surface Waters Exception  
97.03 Prohibited Discharges  
97.04 Restricted Discharges

97.05 Restricted Discharges - Powers  
97.06 Special Facilities  
97.07 Control Manholes  
97.08 Testing of Wastes

**97.01 STORM WATER.** No person shall discharge or cause to be discharged any storm water, surface water, groundwater, roof run-off, sub-surface drainage, uncontaminated cooling water, or unpolluted industrial process waters to any sanitary sewer. Storm water and all other unpolluted drainage shall be discharged to such sewers as are specifically designated as combined sewers or storm sewers, or to a natural outlet approved by the Superintendent. Industrial cooling water or unpolluted process waters may be discharged on approval of the Superintendent, to a storm sewer, combined sewer, or natural outlet.

**97.02 SURFACE WATERS EXCEPTION.** Special permits for discharging surface waters to a public sanitary sewer may be issued by the Council upon recommendation of the Superintendent where such discharge is deemed necessary or advisable for purposes of flushing, but any permit so issued shall be subject to revocation at any time when deemed to the best interests of the sewer system.

**97.03 PROHIBITED DISCHARGES.** No person shall discharge or cause to be discharged any of the following described waters or wastes to any public sewers:

1. Flammable or Explosive Material. Any gasoline, benzene, naphtha, fuel oil, or other flammable or explosive liquid, solid, or gas.
2. Toxic or Poisonous Materials. Any waters or wastes containing toxic or poisonous solids, liquids or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters of the sewage treatment plant, including but not limited to cyanides in excess of two (2) milligrams per liter as CN in the wastes as discharged to the public sewer.
3. Corrosive Wastes. Any waters or wastes having a pH lower than 5.5 or having any other corrosive property capable of causing damage or hazard to structures, equipment, and personnel of the sewage works.

Where necessary in the opinion of the Superintendent, the owner shall provide, at the owner's expense, such preliminary treatment as may be necessary to (a) reduce the biochemical oxygen demand to three hundred (300) parts per million by weight, or (b) reduce the suspended solids to three hundred fifty (350) parts per million by weight, or (c) control the quantities and rates of discharge of such waters or wastes. Plans, specifications, and any other pertinent information relating to proposed preliminary treatment facilities shall be submitted for the approval of the Superintendent and no construction of such facilities shall be commenced until said approvals are obtained in writing.

**97.04 RESTRICTED DISCHARGES.** No person shall discharge or cause to be discharged the following described substances, materials, waters, or wastes if it appears likely in the opinion of the Superintendent that such wastes can harm either the sewers, sewage treatment process, or equipment, have an adverse effect on the receiving stream or can otherwise endanger life, limb, public property, or constitute a nuisance. In forming an opinion as to the acceptability of these wastes, the Superintendent will give consideration to such factors as the quantities of subject wastes in relation to flows and velocities in the sewers, materials of construction of the sewers, nature of the sewage treatment process, capacity of the sewage treatment plant, degree of treatability of wastes in the sewage treatment plant, and other pertinent factors. The substances restricted are:

5. Acids. Any waters or wastes containing strong acid iron pickling wastes, or concentrated plating solution whether neutralized or not.

6. Toxic or Objectionable Wastes. Any waters or wastes containing iron, chromium, copper, zinc, and similar objectionable or toxic substances; or wastes exerting an excessive chlorine requirement, to such degree that any such material received in the composite sewage at the sewage treatment works exceeds the limits established by the Superintendent for such materials.

7. Odor or Taste. Any waters or wastes containing phenols or other taste or odor producing substances, in such concentrations exceeding limits which may be established by the Superintendent as necessary, after treatment of the composite sewage, to meet the requirements of state, federal, or other public agencies or jurisdiction for such discharge to the receiving waters.

8. Radioactive Wastes. Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Superintendent in compliance with applicable State or Federal regulations.

9. Excess Alkalinity. Any waters or wastes having a pH in excess of 9.5.

10. Unusual Wastes. Materials which exert or cause:

A. Unusual concentrations of inert suspended solids (such as, but not limited to, Fullers earth, lime slurries, and lime residues) or of dissolved solids (such as, but not limited to, sodium chloride and sodium sulfate).

B. Excessive discoloration (such as, but not limited to dye wastes and vegetable tanning solutions).

C. Unusual B.O.D., chemical oxygen demand, or chlorine requirements in such quantities as to constitute a significant load on the sewage treatment works.

D. Unusual volume of flow or concentration of wastes constituting "slugs" as defined herein.

11. Noxious or Malodorous Gases. Any noxious or malodorous gas or other substance which either singly or by interaction with other wastes is capable of creating a public nuisance or hazard to life or of preventing entry into sewers for their maintenance and repair.

12. Damaging Substances. Any waters, wastes, materials or substances which react with water or wastes in the sewer system to release noxious gases, develop color of undesirable intensity, form suspended solids in objectionable concentration or create any other condition deleterious to structures and treatment processes.

13. Untreatable Wastes. Waters or wastes containing substances which are not amenable to treatment or reduction by the sewage treatment processes employed, or are amenable to treatment only to such degree that the sewage treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.

**97.05 RESTRICTED DISCHARGES - POWERS.** If any waters or wastes are discharged, or are proposed to be discharged to the public sewers, which waters contain the substances or possess the characteristics enumerated in Section 97.04 and which in the judgment of the Superintendent may have a deleterious effect upon the sewage works, processes, equipment, or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the Superintendent may:

1. Rejection. Reject the wastes by requiring disconnection from the public sewage system;
2. Pretreatment. Require pretreatment to an acceptable condition for discharge to the public sewers;
3. Controls Imposed. Require control over the quantities and rates of discharge; and/or
4. Special Charges. Require payment to cover the added cost of handling and treating the wastes not covered by existing taxes or sewer charges under the provisions of Chapter 99.

**97.06 SPECIAL FACILITIES.** If the Superintendent permits the pretreatment or equalization of waste flows, the design and installation of the

plants and equipment shall be subject to the review and approval of the Superintendent and subject to the requirements of all applicable codes, ordinances, and laws. Where preliminary treatment or flow-equalizing facilities are provided for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation by the owner at the owner's expense.

**97.07 CONTROL MANHOLES.** When required by the Superintendent, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable control manhole together with such necessary meters and other appurtenances in the building sewer to facilitate observation, sampling, and measurement of the wastes. Such manhole, when required, shall be accessibly and safely located, and shall be constructed in accordance with plans approved by the Superintendent. The manhole shall be installed by the owner at the owner's expense, and shall be maintained by the owner so as to be safe and accessible at all times.

**97.08 TESTING OF WASTES.** All measurements, tests, and analyses of the characteristics of waters and wastes to which reference is made in this chapter shall be determined in accordance with the latest edition of "Standard Methods of the Examination of Water and Wastewater," published by the American Public Health Association, and shall be determined at the control manhole provided, or upon suitable samples taken at said control manhole. In the event that no special manhole has been required, the control manhole shall be considered to be the nearest downstream manhole in the public sewer to the point at which the building sewer is connected. Sampling shall be carried out by customarily accepted methods to reflect the effect of constituents upon the sewage works and to determine the existence of hazards to life, limb, and property. (The particular analyses involved will determine whether a twenty-four (24) hour composite of all outfalls of a premises is appropriate or whether a grab sample or samples should be taken. Normally, but not always, B.O.D. and suspended solids analyses are obtained from twenty-four (24) hour composites of all outfalls whereas pH's are determined from periodic grab samples).

## CHAPTER 100

# STORM WATER UTILITY

100.01 Purpose

100.02 Definitions

100.03 Storm Water Drainage System District Established

100.04 Rates

100.05 Payment of Bills

100.06 Lien for Nonpayment

**100.01 PURPOSE.** The purpose of this chapter is to establish a Storm Water Utility and provide a means of funding the construction, operation and maintenance of storm water management facilities including, but not limited to, detention and retention basins, storm water sewers, inlets, ditches and drains, and cleaning of streets. The Council finds that the construction, operation and maintenance of the City's storm and surface water drainage system should be funded through charging users of property which may connect or discharge directly, or indirectly, into the storm and surface water drainage system.

**100.02 DEFINITIONS.** For use in this chapter, unless the context specifically indicates otherwise, the following terms are defined:

1. "Connection" means the physical act or process of tapping a public storm water sewer or drainage line, or joining onto an existing side sewer, for the purpose of connecting private impervious surface or other storm and surface water sources or systems to the public storm and surface water system. It also includes creation or maintenance of impervious surface that causes or is likely to cause an increase in the quantity or decrease in quality or both from the natural state of storm water runoff, and which drains, directly or indirectly, to the storm and surface water system.
2. "Customer" means, in addition to any person receiving storm water service from the City, the owner of the property served, and as between such parties the duties, responsibilities, liabilities and obligations hereinafter imposed shall be joint and several.
3. "Storm and surface water drainage system" means any combination of publicly owned storm and surface water quantity and quality facilities, pumping, or lift facilities, storm and secondary drain pipes and culverts, open channels, creeks and ditches, force mains, laterals, manholes, catch basins and inlets, including the grates and covers thereof, detention and retention facilities, laboratory facilities and equipment, and any other publicly owned facilities for the collection, conveyance, treatment and disposal of storm and surface water system

within the City, to which sanitary sewage flows are not intentionally admitted.

4. “User” means any person who uses property that maintains connection to, discharges to, or otherwise receives services from the City for storm water management. The occupant of occupied property is deemed the user. If the property is not occupied, the person who has the right to occupy it shall be deemed the user.

**100.03 STORM WATER DRAINAGE SYSTEM DISTRICT ESTABLISHED.** Pursuant to the authority of Section 384.84[5] of the Code of Iowa, the entire City is hereby declared a Storm Water Drainage System District for the purpose of establishing, imposing, adjusting and providing for the collection of rates for the operation and maintenance of storm water management facilities. The entire City, as increased from time to time by annexation, shall constitute a single Storm Water Drainage System District.

*(Code of Iowa, Sec. 384.84)*

**100.04 RATES.** Each customer shall pay for storm and surface water drainage system service provided by the City. The rates for the operation and maintenance of the storm water management facilities shall be collected by imposing a monthly rate on each residential, commercial and industrial user within the City. The Council may adopt rules, charges, rates, and fees for the use of the City’s storm and surface water system, and for services provided by the City relating to that system. Such rules may include delinquency and interest charges and penalties. Such charges and fees shall be just and equitable based upon the actual costs of operation, maintenance, acquisition, extension and replacement of the City’s system, the costs of bond repayment, regulation, administration, and services of the City. A fee of two dollars (\$2.00) shall be charged to each residential utility customer each billing cycle and a fee of three dollars (\$3.00) shall be charged to each commercial utility customer each billing cycle.

**100.05 PAYMENT OF BILLS.** All Storm Water Drainage System District charges shall be due and payable under the same terms and conditions provided for payment of a combined service account as contained in Section 92.04 of this Code of Ordinances. All City services may be discontinued in accordance with the provisions contained in Section 92.05 if the combined service account becomes delinquent, and the provisions contained in Section 92.08 relating to lien notices shall also apply in the event of a delinquent account.

*(Code of Iowa, Sec. 384.84)*

**100.06 LIEN FOR NONPAYMENT.** Except as provided for in Section 92.07 of this Code of Ordinances, the owner of the premises served and any lessee or tenant thereof shall be jointly and severally liable for charges for the operation and maintenance of the storm water management facilities. Any such charges remaining unpaid and delinquent shall constitute a lien upon the premises served and shall be certified by the Clerk to the County Treasurer for collection in the same manner as property taxes.

## CHAPTER 107

# RECYCLING

### 107.01 Definition

### 107.02 Separation of Recyclables Required

**107.01 DEFINITION.** “Recyclables” means designated consumer wastes which are collected and marketed for resource recovery. This includes all items accepted for recycling, all of which must be clean, and currently includes:

1. Plastics. All plastic containers designed as recyclable.
2. Aluminum. All types of aluminum including beverage cans, pie pans and trays and aluminum foil.
3. Glass. Beverage and food containers, colored clear, green or amber, non-broken and lids removed (labels need not be removed). Absolutely no drinking glasses, light bulbs, ceramics, window glass, Pyrex or dishes of any type.
4. Tin. Food containers only. Labels need not be removed.
5. Paper. Includes newspapers (including inserts), typing paper and envelopes, computer paper, magazines that have shiny pages and cardboard. Does not include paper towels, tissues or wax paper.

Because the definition of recyclables depends upon what products are accepted, the above listing is subject to change from time to time.

**107.02 SEPARATION OF RECYCLABLES REQUIRED.** All recyclables shall be separated from all other garbage and refuse accumulated by every residence and business establishment within the City and properly disposed of as follows: The City will contract with a hauler who will pick up recyclables from each residence within the City and properly dispose of same. The City will directly bill each residential household monthly and collect said funds for payment by the City directly to the hauler. Failure to separate recyclable materials from other garbage or refuse will result in the premises’ garbage not being collected and after written notice of the violation of this chapter and failure to correct the violation, the responsible party shall be charged with a violation of this Code of Ordinances.

**113.01 TERM OF FRANCHISE.** Mechanicsville Cablevision, its successors and assigns (hereinafter referred to as “Grantee”) are hereby granted the right, franchise and authority for a period of twenty-five (25) years to construct, and continue to operate, a cable television system over, under and upon property of the City and to sell and supply to individuals, firms and corporations, public or private, at any and all places within the corporate limits of the City, as said limits now are or hereafter may be established, audio and video communications and such other services as are now available and those which may in the future become available as part of the Cable Television Industry, subject to the conditions and restrictions hereinafter provided and subject to Chapter 114 of this Code of Ordinances, hereinafter referred to as the “Cable Television Regulations.”

**113.02 AGREEMENT AND WAIVER.** Grantee agrees to abide by all provisions of the franchise and all other applicable ordinances of the City, including, but not limited to the Cable Television Regulations as presently enacted and as may be hereafter amended by the City. Further, Grantee agrees that it will not set up as against the City and claim that the provisions of the franchise or any other applicable ordinances are unreasonable, arbitrary or void.

**113.03 NONEXCLUSIVE FRANCHISE.** The franchise shall not be exclusive and shall neither restrict the Council in the exercise of its regulatory power nor prevent it from granting any other cable television system franchise or franchises.

**113.04 SUBSCRIBER RATES AND CHARGES.** Grantee shall be allowed to charge the rates and charges for its services as set forth in the Cable Television Regulations as presently enacted or as hereafter amended.

**113.05 CHANGE OF RATES AND CHARGES.** Any increase in rates and charges shall be made only in accordance with the procedures set forth in the Cable Television Regulations as presently enacted or hereafter amended.

**113.06 RATES FOR NEW SERVICES.** To the extent permitted by the Federal Communications Commission (FCC) Rules and Regulations, rates or charges for new services which may be offered in the future by Grantee shall be established by the City upon application of Grantee. Such rates or charges shall be established in accordance with the procedure for rate changes as set forth in Section 113.05 above.

**113.07 FRANCHISE FEE.** The franchise fee will be in accordance with the provisions of the Cable Television Regulations.

**113.08 CONSTRUCTION.** All construction and reconstruction of Grantee's facilities shall be in strict compliance with the rules and regulations of the FCC and of the Cable Television Regulations of the City.

**113.09 OBSERVANCE OF FCC REGULATIONS.** Grantee shall comply with all applicable rules and regulations of the FCC which are now in effect or which may hereafter be promulgated. Furthermore, any modifications of Section 76.31 of sub-part C - *Federal-State/Local Regulatory Relationships*, of the FCC Rules and Regulations pertaining to cable television systems shall be incorporated into this franchise within one year of the adoption of said modification by the FCC or at the time of any renewal of the franchise, whichever occurs first.

**113.12 TRANSFER OF FRANCHISE.** Grantee shall not sell, transfer or assign the franchise without prior approval of the Council.

**113.13 FORFEITURE AND TERMINATION.** If the Grantee fails to comply with any of the provisions of the franchise or defaults in any of its obligations hereunder, except for causes beyond the reasonable control of the Grantee, and fails within thirty (30) days after written notice from the City to commence and, within a reasonable time, complete the correction of such default or noncompliance, the City shall have the right to revoke the franchise and all rights of the Grantee hereunder. In the event Grantee shall be dissolved or liquidated or should Grantee file a voluntary petition in bankruptcy or be adjudged as bankrupt, or should there be an appointment of a receiver for Grantee or any portion of its property constituting a part of the franchise or the approval by a court of competent jurisdiction of a petition applicable to Grantee in any proceedings instituted under the provisions of the Federal bankruptcy laws or under any similar acts which may hereafter be enacted, the City may declare the franchise herein granted forfeited and terminated.

**113.14 DEREGULATION.** If any Federal or State power, authority or jurisdiction over the cable services delivery system is deregulated, withdrawn or reduced, the City shall have the option to exercise such power, authority or jurisdiction over the Grantee to the extent such was exercisable at the time the franchise became effective. If at any time the powers, rights and duties of the City or any agent or official of the City are transferred by law to any other board, authority, agent or official, then such other entity shall have the powers, rights and duties previously vested under the franchise in the City.

**113.15 SUBSCRIBER PRIVACY.** Neither the Grantee nor any other person shall arrange for or permit the tapping of any subscriber tap, cable, line, signal output device, subscriber outlet or receiver for any purpose whatsoever. Neither the City nor any other person shall monitor or arrange for or permit the monitoring of any subscriber tap, cable, line, signal input device or subscriber outlet or receiver without prior written valid authorization from each subscriber so affected, except that the Grantee may scan all and only all subscribers for unauthorized reception of service or for the total number of unidentified subscribers using a service at a given time. Any request for authorization to monitor shall be made available to the authorizing subscriber in understandable fashion, and shall never be a condition, or even have the appearance of being a condition, for the reception of any cable service. Before Grantee monitors or allows any monitoring of a cable delivered service, at its own expense, it shall provide the affected subscriber a signaling device which informs the subscriber when such subscriber's use of a cable service is being monitored. Nothing in this section shall be construed to prohibit the subscriber's voluntarily sending and the grantor's receiving, upstream signals as part of a cable service specifically designed and so understood by the subscriber for the purpose of the subscriber's voluntarily and knowingly sending upstream messages or signals.

**113.16 NEW DEVELOPMENTS.** The Council may amend this chapter whenever necessary to enable franchisee to take advantage of any developments in the field of transmission of communications signals which will afford it an opportunity to more effectively, efficiently or economically serve its customers; however, this section shall not be construed to require the City to make any such amendment.

**113.17 APPROVAL OF RATES.** All rates for the provision of service to subscribers, whether private or commercial, are subject to the prior approval of the City.

**113.18 FRANCHISE RENEWAL**

1. Public Meeting to Be Scheduled. At least six (6) months prior to the expiration of a franchise, the City shall schedule and hold a public meeting or meetings with the Grantee to review and discuss the performance of the Grantee under the franchise, including the results following previous franchise reviews. In particular, the City may inquire whether the Grantee is supplying a level and variety of services equivalent to those being generally offered at that time in the industry in comparable market situations. The Grantee shall make available, if requested by the City, such records, information and documents which are relevant to such meetings and inquiry. Any interested person shall have the opportunity to be heard regarding whether or not the Grantee did reasonably comply with the terms and conditions imposed by this chapter and the franchise agreement.

2. Determination on Re-issue. Irrespective of the type and quality of the performance of the Grantee, the City is under no obligation whatsoever to re-issue a franchise to the Grantee. At least five (5) months prior to the expiration of the franchise, however, the City shall advise the Grantee whether or not the franchise re-issuance shall be based solely upon negotiations by and between the Grantee and the City. The failure to re-issue such a franchise, however, shall not prohibit the Grantee from applying for a new franchise in competition with other applicants for a franchise in the event the City decides to consider proposals from new applicants for the franchise.

**113.19 ENFORCEMENT.** Any repeated violation by the Grantee, its vendee, lessee or its successors, of any material provision of this chapter or of any supplemental written agreement entered into by and between the City and the Grantee or the failure to promptly perform any of the provisions thereof, not satisfactorily resolved, shall after reasonable notice to the Grantee requesting such performance or the resolution of such complaints be cause for cancellation of all rights under the franchise.

The definitions shall also control and be applicable to any cable television franchise.

1. “Cable television system” (or CATV system) means any facility that, in whole or in part, receives directly or indirectly over the air and amplifies or otherwise modifies the signals transmitting programs broadcast by one or more television or radio stations and distributes such signals by wire or cable to subscribing members of the public who pay for such service.

7. “FCC” means the Federal Communications Commission.
8. “Franchise” means a legal contract between the City and a person, which contract contains terms and conditions for constructing and operating a cable television system.
9. “Ghost images” means weak or shadowy images in the received picture, offset from the primary image.
10. “Grantee” means a person holding a franchise to operate a cable television system.
11. “House drop” means the wire or cable that connects each building or home to the main (trunk) cable.
12. “Outlet” means the point of connection of the cable or wire to a television or radio receiver.
13. “Subscriber” means a person who purchases cable television services.

**114.03 COMPLIANCE WITH APPLICABLE LAW.** A Grantee shall at all times comply with the rules and regulations of the FCC and shall also comply with all other applicable statutes, ordinances and regulations. FCC rules and regulations shall in all cases be controlling if any part of this chapter or any cable television franchise is in conflict with any FCC rules and regulations.

**114.04 PERFORMANCE STANDARDS.** A Grantee shall produce a picture in black and white or in color, that is undistorted, free from ghost images and accompanied with proper sound on typical standard production TV sets in good repair. A Grantee shall also transmit signals of adequate strength to produce good pictures with good sound at all outlets throughout the City without causing cross-modulation in the cables or interfering with other electrical or electronic systems.

**114.05 SERVICE PROCEDURES.** During the term of the franchise and any renewal thereof, the Grantee shall maintain within the City a nearby office or agent for the purpose of receiving and resolving all questions regarding the quality of service, equipment malfunctions and similar matters. The provisions of this section shall be complied with if the Grantee may be reached by nearby toll-free telephone call and provides the Clerk’s office with the name, address and telephone number of a person who will act as the Grantee’s agent to receive complaints regarding quality of service, equipment malfunctions and similar

matters. The nearby office shall be open to receive inquiries or complaints from subscribers during normal business hours, and in no event less than 9:00 a.m. to 5:00 p.m., Monday through Friday. Any complaints from subscribers shall be investigated and acted upon as soon as possible, but at least within four (4) business days after their receipts. The Grantee shall keep a maintenance log which will indicate the nature of each service complaint, the date and time it was received, the disposition of said complaint and the time and date thereof. The log shall be made available for periodic inspection by the City.

**114.06 PROGRAM ALTERATION PROHIBITED.** All programs of broadcasting stations carried by a Grantee shall be carried in their entirety as received, with announcement and advertisement and without additions.

**114.07 REMOVAL OF EXISTING ANTENNA.** A Grantee shall in no way tamper with or remove an existing television antenna without the subscriber's consent.

**114.08 SYSTEM CONSTRUCTION, MAINTENANCE AND PROCEDURES.**

1. In furtherance of the Grantee's execution of contracts with public utility companies or any other owner or lessee of any poles located within or without the City to whatever extent such contract or contracts may be expedient and of advantage to the Grantee for use of poles and posts necessary for proper installation of the system, the Grantee may obtain right-of-way permits from appropriate State, County and Federal officials necessary to cross highways or roads under their respective jurisdictions, to supply main trunk lines from the Grantee's receiving antennas, obtain permission from the Federal Aviation Authority to erect and maintain antennas suitable to the needs of the system and its subscribers and obtain whatever other permits a City, County, State or Federal agency may require. The Grantee shall construct its cable system using material of good and durable quality and all work involved in the construction, installation, maintenance and repair of the cable system shall be performed in a safe, thorough and reliable manner. Any municipal property damaged or destroyed shall be promptly repaired or replaced by the Grantee and restored to serviceable condition.

2. The Grantee's system, poles, wires and appurtenances shall be located, erected and maintained so that none of its facilities shall endanger or interfere with the lives of persons or interfere with any improvements the City may deem proper to make or unnecessarily hinder or obstruct the free use of the streets, alleys, bridges, easements or public property.

3. In the event that the City annexes further territory as authorized by the law, the Grantee shall extend energized trunk cable to the remaining portions of the City so annexed within an acceptable time thereafter, unless additional time is granted by the Council upon request of the Grantee for good cause shown. Extension of service shall not be one of the requirements as set forth in this section.
4. All transmission and distribution structures, lines and equipment erected by the Grantee within the City shall be so located as to cause minimum interference with the proper use of streets, alleys and other public ways and places, and to cause minimum interference with the rights of reasonable convenience of property owners who adjoin any of the said streets, alleys or other public ways and places. In the event electrical and phone lines are buried to the subscriber's residence, the Grantee shall be required to bury the cable also.
5. In case of any disturbance of pavement, sidewalk, driveway, grass or other surfacing, the Grantee shall, at its own cost and expense and in a manner approved by the City, replace and restore all paving, sidewalk, driveway, grass or surface of any street or alley or other public or private property in as good condition as before said work was commenced.
6. In the event that at any time during the period of the franchise the City lawfully elects to alter or change the grade of any street, alley or other public way, the Grantee, upon reasonable notice by the City, shall remove, relay or relocate its wires, cables, underground conduits, manholes and other fixtures at its own expense.
7. The Grantee shall not place poles or other fixtures where the same will interfere with any gas, electric or telephone fixtures, water hydrants or mains and all such poles or other fixtures placed in any street shall be placed at the outer edge of the sidewalk and inside the curb line, and those placed in alleys shall be placed close to the line of the lot abutting on said alley, and then in such manner as not to interfere with the usual travel on said streets, alleys and public ways.
8. The Grantee shall, on the request of any person holding a building moving permit issued by the City, temporarily raise or lower its wires to permit the moving of buildings. The expense of such temporary removal, raising or lowering of wires shall be paid by the person requesting the same and the Grantee shall have the authority to require such payment in advance. The Grantee shall be given no less than forty-eight (48) hours' advance notice to arrange for such temporary wire changes.

9. The Grantee shall have the authority to trim trees upon and overhanging streets, alleys, sidewalks and public places of the City so as to prevent the branches of such trees from coming in contact with the wires and cables. All tree trimming is to be done at the expense of the Grantee.

10. The Grantee shall provide, upon request and without charge, service to any municipal buildings owned and operated by the City and to any public or parochial elementary or secondary school. This means only an energized cable to such building. The cost of any internal wiring shall be borne by the institution.

#### **114.09 PLACEMENT AND USE OF POLES.**

1. Where poles or other wire-holding structures already serving the City are available for use by any Grantee, but Grantee does not make arrangements for such use, the City may require a Grantee to use such poles and structures if the City determines that the public convenience would be enhanced thereby and if the terms of the use available to the Grantee are just and reasonable.

2. Where the City or a public utility serving the City desires to make use of the poles or other wire-holding structures of a Grantee but agreement with a Grantee cannot be reached, the City may require the Grantee to permit such use for such consideration and upon such terms as the City deems to be just and reasonable, if the City determines that the use would enhance the public convenience and would not unduly interfere with a Grantee's operations.

3. No Grantee shall erect or maintain any poles or aerial wires or cables within any underground districts which have been established by the City or which may hereafter be established by the City. Furthermore, no poles or aerial wires or cables shall be installed or maintained in any area where other utilities are required by law to be underground or where such other utilities are already installed underground.

**114.10 REMOVAL OF EQUIPMENT UPON EXPIRATION OF FRANCHISE.** Upon the termination or cancellation of any cable television franchise, a Grantee shall remove its poles, cable television transmission and distribution systems and all other appurtenances from the streets, sidewalks and public ways of the City, when ordered to do so by the City, and shall restore such streets, sidewalks and public ways to their original condition. If the Grantee fails to remove such items or fails to remove such items in a reasonable time after notification by the City, the City shall have the right and authority to remove such poles, cable television transmission and distribution systems and other appurtenances from the City streets, sidewalks and public ways.

**114.11 LINE EXTENSIONS.** It shall be the obligation of the Grantee to serve all residents of the City except to the extent that density of homes, adverse terrain or other factors render providing service impracticable, technically infeasible or economically noncompensatory. For purposes of determining compliance with the provisions of this section, and to provide for a reasonable and nondiscriminatory policy governing extensions of cable service with the City, the Grantee shall extend service to new subscribers at the normal installation charge and monthly rate for customers of that classification where there is an average of forty-five (45) homes per each linear mile of new cable construction. In the event the requirements of this section are not met, extensions of service shall be required only a basis which is reasonable and compensatory.

4. Construction Approval by City. Except for individual service drops, the Grantee shall not erect any pole, install any underground lines or conduits, run any line, make any attachment, nor shall any construction of any kind be commenced without the prior approval of the City Engineer or other appropriate department of the City, which approval shall not be unreasonably withheld, and the City shall have and maintain the right to inspect the construction, operation and maintenance of the system by the Grantee to insure the proper performance of the terms of this chapter.

**114.13 RATES.** In consideration for services rendered to subscribers, the Grantee shall have the right to charge and collect reasonable and just compensation which shall reflect, among other things, the Grantee's need to

attract new capital and provide a reasonable return on invested capital. No increase shall be implemented without the prior specific approval of the Council.

**114.14 FRANCHISE FEE.** Within thirty (30) days after the end of each quarter of the Grantee's fiscal year, the Grantee shall pay to the City a franchise fee equivalent to three percent (3%) of the gross revenues from all cable services for that quarter, subject to the following:

2. The Council may change the franchise fee back to five percent (5%) in the event the FCC removes restrictions on the use of the franchise fee by the City.

**114.15 CHANGE OF CONTROL OF GRANTEE.** Prior approval of the Council shall be required where ownership or control of more than twenty-five percent (25%) of the right of control of a Grantee is acquired by a person or several persons acting in concert, none of whom already owns or controls twenty-five percent (25%) or more of such right of control, singularly or collectively. Any such acquisition occurring without prior approval of the Council shall constitute a violation of a Grantee's franchise.

**114.16 INSPECTION OF RECORDS.** The City shall have the right, power and authority to inspect the records of any Grantee at the premises of such Grantee during the normal business hours of any working day, or at any other reasonable time and place provided Grantee is given no less than seven (7) days' notice.

**114.17 SUPERVISION AND INSPECTION.** The City shall have the right to supervise all construction or installation work performed by any Grantee in the City and make such inspections as it shall find necessary to insure compliance with the terms of any cable television franchise, this chapter or other pertinent provisions of law.

**114.18 FILINGS AND COMMUNICATIONS WITH REGULATORY AGENCIES.** Copies of all petitions, applications and communications submitted by any Grantee to the FCC, Securities and Exchange Commission or any other Federal or State regulatory commission or agency having jurisdiction in regard to any matters affecting cable television shall also be submitted simultaneously to the Council.

Nothing in this section, however, shall be deemed to prohibit promotional campaigns to stimulate subscriptions to the system or be deemed to prohibit the charging of special rates so long as that rate is reasonable, lawful and has received the prior approval of the Council after notice and hearing. A Grantee shall not discriminate against any person on the basis of race, religion, color, creed, sex, national origin or ancestry. Furthermore, a Grantee shall also take affirmative action to recruit employees from members of minority groups.

**114.20 PROTECTION OF PRIVACY.** The Grantee shall not permit the installation of any special terminal equipment in any subscriber's premises that will permit transmission from subscriber's premises of two-way services utilizing aural, visual or digital signals without first obtaining written permission of the subscriber. It is unlawful for any person to attach or affix or cause to be attached or affixed any equipment or device which allows access or use of the cable television service without payment to the Grantee for same. Such action shall be a simple misdemeanor.

**114.21 PROGRAM CONTENT RESTRICTIONS.** In addition to providing basic cable television service consisting of broadcast and automated signals, the Grantee may offer subscribers optional services on a per-program or per-channel basis. However, the Grantee shall not display X-rated motion pictures either as part of its basic cable or pay cable services.

**114.22 LIABILITY AND INDEMNIFICATION.** The Grantee shall indemnify the City and hold it harmless from all liability, damage, cost or expense arising from claims of injury to persons or damage to property occasioned by reason of any conduct undertaken pursuant to this chapter. The City shall notify the Grantee's representative within fifteen (15) days after the presentation of any claim or demand to the City, either by suit, or otherwise, made against the City on account of any negligence or contract as aforesaid on the part of the Grantee. The Grantee agrees as follows:

1. The Grantee shall carry Worker's Compensation insurance with statutory limits and Employers' Liability insurance with limits of not less than one hundred thousand dollars (\$100,000.00) which shall cover all operations to be performed by the Grantee as a result of this chapter.

person and one million dollars (\$1,000,000.00) as to any one occurrence. The City shall reserve the right during the term of the franchise to increase or decrease the amount of insurance coverage required, provided that notice in writing is made to the Grantee of all increases or decreases in said insurance coverage requirements. The Grantee shall, within sixty (60) days of receipt of that written notice, obtain such insurance coverage as is specified in said notice.

3. Grantee's Worker's Compensation, Comprehensive General Liability and Comprehensive Automobile Liability insurance shall be written by an insurance company with a capital and/or surplus of not less than three million dollars (\$3,000,000) and Grantee agrees to furnish the City with certified copies or certificates of insurance of said policies, which shall provide that insurance shall not be canceled unless ten (10) days' prior written notice first be given to the City.

<b>PERFORMANCE STANDARDS</b>

Conditions which do not comply shall not be increased in scope or magnitude. Such uses shall be permitted to be enlarged or altered provided that the addition or change conforms with the applicable performance standards.</li> <li>3. Certification: The Building Official, Mayor or Council may, when they deem it necessary, require certification by a registered professional engineer or other qualified person so that the performance standards for a proposed use can be met or that an existing use is complying with the performance standards. **165.10 SUPPLEMENTARY DISTRICT REGULATIONS.** Subject to Section 165.09, the following provisions, regulations or exceptions shall apply equally to all districts except as hereinafter provided.

1. **Visibility at Intersection.** On a corner lot in any district, except in the C-2, General Retail District, no fence, wall, hedge, or other planting or structure that will obstruct vision between a height of two (2) feet and ten (10) feet above the centerline grades of the intersecting streets shall be erected, placed or maintained within the triangular area formed by connecting the right-of-way lines at points which are twenty-five (25) feet distant from the intersection of the right-of-way lines, and measured along the right-of-way lines.
2. **Accessory Buildings.** No accessory building shall be erected in any required front or side yard and no separate accessory buildings shall be erected within five (5) feet of any main building or within five (5) feet of a rear lot line.
3. **More Than One Principal Structure on a Lot.** In any district, more than one (1) principal structure housing a permitted principal use may be erected on a single lot provided that the area, yard and other requirements of this chapter shall be met for each structure as though it were on an individual lot.
4. **Height Regulation Exception.** The height limitations contained in the Schedules of District Regulations do not apply to grain storage bins, grain elevators, feed mills, or to spires, belfries, cupolas, chimneys, antennas, water tanks, ventilators, elevator housings or other structures placed above the roof level and not intended for human occupancy.
5. **Use of Public Right-of-way.** No portion of the public road, street or alley rights-of-way shall be used or occupied by any abutting use of land or structures for storage or display purposes, or to provide any parking or loading space required by this chapter, or for any other purpose that would obstruct the use or maintenance of the public right-of-way.
6. **Proposed Use Not Covered in Chapter.** Any proposed use not covered in this chapter as a permitted use or special exception shall be referred to the Commission for a recommendation as to the proper district in which such use should be permitted and the chapter amended as provided in Section 165.38 before a permit is issued for such proposed use.

7. Buildings to Have Access. Every building hereafter erected or structurally altered shall be on a lot or parcel having a frontage on a public street or road.
8. Travel Trailers. Occupied travel trailers and camping trailers shall be located only in an approved tourist or trailer campground.
9. Hedges and Fences.
  - A. Permits and Fees. An approved building permit with paid fees is required for all fences or walls prior to construction.
  - B. Height. Fences or hedges shall not exceed four (4) feet in height in any required front yard and shall not exceed six (6) feet in height in any required side or rear yard, subject to the further restriction of Subsection 1.
  - C. Location. The owner of a fence shall provide and maintain a two-foot setback from adjoining public or private property for the purpose of fence maintenance access. An exception may be granted if two neighbors agree to jointly put a fence on the property line. Each owner will maintain their side of the fence. Both property owners are required to sign the fence permit application.
  - D. Property Line. The property owner is required to locate the official survey pins or have the lot survey made by a licensed surveyor with the corner pins located, if there is any conflict or discrepancy on the property line location.

*(Subsection 9 – Ord. 295 – Feb. 19 Supp.)*
10. Agricultural Uses. Any vacant parcel of land regardless of size in any district may be used for agricultural purposes, the raising of feed and grain crops, fruit or vegetables, provided, however, that no livestock, poultry or other animals other than customary household pets shall be kept on land or in confinement within three hundred (300) feet of any dwelling unit other than that of the owner.

**165.11 APPLICATION OF DISTRICT REGULATIONS.** Subject to Section 165.09, the regulations and restrictions of this chapter shall apply as follows:

1. Regulations To Be Uniformly Applied. The regulations set by this chapter shall apply uniformly to each class or kind of structure or land, and particularly within each district, except as hereinafter provided.
2. All Uses and Structures to Conform. No building, structure or land shall hereafter be used or occupied, and no building or structure or part thereof shall hereafter be erected, constructed, reconstructed, moved

or structurally altered unless in conformity with all of the regulations herein specified for the district in which it is located.

3. Height, Density or Yards Shall Not Be Violated. No building or other structure shall hereafter be erected or altered to exceed the height, to accommodate or house a greater number of families, or to have narrower or smaller rear yards, front yards, side yards or other open spaces than herein required or in any other manner contrary to the provisions of this chapter.

4. Separate Yards, Open Space and Off-street Parking Required. No part of a yard, other open space or off-street parking or loading space required about or in connection with any building for the purpose of complying with this chapter shall be included as part of a yard, open space or off-street parking or loading space similarly required for any other building.

5. Minimum Yards and Lot Areas May Not Be Reduced. No yard or lot existing at the time of passage of this zoning ordinance shall be reduced in dimension or area below the minimum requirements set forth herein. Yards or lots created after the effective date of this zoning ordinance shall meet at least the minimum requirements established by this chapter.

6. New Areas. All territory which may hereafter become a part of the incorporated area of the City through annexation shall be classified in the A-1 Agricultural District until otherwise classified, provided that the Commission may recommend the appropriate district classification prior to such territory becoming a part of the City and upon holding a public hearing and approval by the Council the territory upon becoming part of the community may immediately be so classified.

**165.12 NONCONFORMING USES.** Within the districts established by this chapter or amendments that may later be adopted, there exist lots, structures and uses of land and structures which were lawful before the zoning ordinance was passed or amended but which would be prohibited, regulated or restricted under the terms of this chapter or future amendment. Subject to Section 165.09, it is the intent of this chapter to permit these nonconformities to continue until they are removed, but not to encourage their survival. Such uses are declared by this chapter to be incompatible with permitted uses in the districts involved. It is further the intent of this chapter that nonconformities shall not be enlarged upon, expanded or extended, nor be used as grounds for adding other structures or uses prohibited elsewhere in the same district.

**165.13 NONCONFORMITIES MAY NOT BE ENLARGED.** A nonconforming use of a structure, a nonconforming use of land, or a

nonconforming use of a structure and land shall not be extended or enlarged after the effective date of this zoning ordinance by attachment on a building or premises of additional signs intended to be seen from off the premises, or by the addition of other uses of a nature which would be prohibited generally in the district involved. To avoid undue hardship, nothing in this chapter shall be deemed to require a change in the plans, construction or designated use of any building on which actual construction was lawfully begun prior to the effective date of adoption or amendment of this zoning ordinance and upon which actual building construction has been diligently carried on. Actual construction is hereby defined to include the placing of construction materials in permanent position and fastened in a permanent manner, except that where demolition or removal of an existing building has been substantially begun preparatory to rebuilding, such demolition or removal shall be deemed to be actual construction, provided that work shall be diligently carried on until completion of the building involved.

**165.14 NONCONFORMING LOTS OF RECORD.** In any district in which single-family dwellings are permitted, notwithstanding limitations imposed by other provisions of this chapter, a single-family dwelling and customary accessory buildings may be erected on any single lot of record at the effective date of adoption or amendment of this zoning ordinance. Such lot must be in separate ownership and not of continuous frontage with other lots in the same ownership. This provision shall apply even though such lot fails to meet the requirements for area or width or both that are generally applicable in the district, provided that yard dimensions and other requirements not involving area or width of the lot, or both, shall conform to the regulations for the district in which such lot is located. Variance of area, width and yard requirements shall be obtained only through action of the Board of Adjustment. If two (2) or more lots or combinations of lots and portions of lots with continuous frontage in single ownership are of record at the time of passage or amendment of this zoning ordinance, and if all or part of the lots do not meet the requirements for lot width and area as established herein, the land involved shall be considered to be an undivided parcel for the purposes of this chapter, and no portion of said parcel shall be used or sold which does not meet lot width and area requirements established by this chapter, nor shall any division of the parcel be made which leaves remaining any lot width or area below the requirements stated in this chapter.

**165.15 NONCONFORMING USES OF LAND.** Where, at the effective date of adoption or amendment of this zoning ordinance, lawful use of land exists that is made no longer permissible under the terms of this zoning ordinance as enacted or amended, such use may be continued so long as it remains otherwise lawful, subject to the following provisions:

1. No such nonconforming use shall be enlarged or increased or extended to occupy a greater area of land than was occupied at the effective date of adoption or amendment of this chapter.
2. No such nonconforming use shall be moved in whole or in part to any other portion of the lot or parcel occupied by such use at the effective date of adoption or amendment of this chapter.
3. If any such nonconforming use of land ceases for any reason for a period of more than one (1) year, any subsequent use of such land shall conform to the regulations specified by this chapter for the district in which such land is located.

**165.16 NONCONFORMING STRUCTURES.** Where a lawful structure exists at the effective date of adoption or amendment of this zoning ordinance that could not be built under the terms of this chapter by reason of restrictions on area, lot coverage, height, yards or other characteristics of the structure or its location on the lot, such structure may be continued for as long as it remains otherwise lawful, subject to the following provisions:

1. No such structure may be enlarged or altered in a way which increases its nonconformity.
2. Should such structure be destroyed by any means to an extent of more than fifty percent (50%) of its replacement cost at the time of destruction, it shall not be reconstructed except in conformity with the provisions of this chapter.

**165.17 NONCONFORMING USES OF STRUCTURES.** If a lawful use of a structure or of structure and premises in combination exists at the effective date of adoption or amendment of this zoning ordinance that would not be allowed in the district under the terms of this chapter, the use may be continued so long as it remains otherwise lawful, subject to the following provisions:

1. No existing structure devoted to a use not permitted by this chapter in the district in which it is located shall be enlarged, extended, constructed, reconstructed, moved or structurally altered except in changing the use of the structure to a use permitted in the district in which it is located.
2. Any nonconforming use may be extended throughout any parts of a building which were manifestly arranged or designed for such use at the time of adoption or amendment of this chapter, but no such use shall be extended to occupy any land outside such building.
3. If no structural alterations are made, any nonconforming use of a structure or structure and premises in combination may be changed to

another nonconforming use provided that the Board of Adjustment, either by general rule or by making findings in the specific case, shall find that the proposed use is equally appropriate or more appropriate to the district than the existing nonconforming use. In permitting such change, the board may require appropriate conditions and safeguards in accord with the provisions of this chapter.

4. Any structure or structure and land in combination in or on which a nonconforming use is superseded by a permitted use shall thereafter conform to the regulations for the district in which such structure is located, and the nonconforming use may not thereafter be resumed.

5. When a nonconforming use of a structure or structure and premises in combination is discontinued for six (6) consecutive months or for eighteen months during any three-year period, the structure thereafter shall not be used except in conformance with the regulations of the district in which it is located.

6. Where nonconforming use status applies to a structure and premises in combination, removal or destruction of the structure shall eliminate the nonconforming status of the land.

**165.18 REPAIRS AND MAINTENANCE.** On any building devoted in whole or in part to any nonconforming use, work may be done in any period of twelve (12) consecutive months on ordinary repairs, or on repair or replacement of nonbearing walls, fixtures, wiring or plumbing, to an extent not exceeding ten percent (10%) of the current replacement value of the building, provided that the cubic content of the building as it existed at the time of passage or amendment to this zoning ordinance shall not be increased. Nothing in this chapter shall be deemed to prevent the strengthening of or restoring to a safe condition of any building or part thereof declared to be unsafe by any official charged with protecting the public safety, upon order of such official.

**165.19 USES UNDER SPECIAL EXCEPTION PROVISIONS.** Any use for which a special exception is permitted as provided in this chapter shall not be deemed a nonconforming use, but shall without further action be deemed a conforming use in such district.

**165.20 ADMINISTRATION AND ENFORCEMENT.** An administrative officer designated by the Council shall administer and enforce this chapter and may be provided with the assistance of such other persons as the Council may direct. If the administrative officer finds that any of the provisions of this chapter are being violated, the administrative officer shall notify in writing the person responsible for such violation, indicating the nature of the violation and ordering the action necessary to correct it. The administrative officer shall

order discontinuance of illegal buildings or structures or of additions, alterations or structural changes thereto, discontinuance of any illegal work being done, or shall take any other action authorized by this chapter to insure compliance with or to prevent violation of its provisions.

**165.21 APPEALS FROM DECISION OF ADMINISTRATIVE OFFICER.** Appeals from any decision of the administrative officer may be made to the Board of Adjustment as provided in Section 165.31.

**165.22 INTERPRETATION OF PROVISIONS.** In their interpretation and application, the provisions of this chapter shall be held to be minimum requirements adopted for the promotion and protection of the public health, safety and general welfare. Wherever the requirements of this chapter are at variance with the requirements of any other lawfully adopted rules, regulations, ordinance, deed restrictions or covenants, the most restrictive or that imposing the higher standards shall govern.

**165.23 VIOLATIONS.** Any person who violates or fails to comply with the provisions of this chapter shall be guilty of a simple misdemeanor and shall pay all costs and expenses involved in the prosecution of the violation. Each day such violation continues shall constitute a separate offense.

**165.24 SEPARATE OFFENSES MAY BE CHARGED.** The owners or tenants of any building, structure, land or part thereof and any architect, builder, contractor, agent or other person who commits, participates in, assists in or maintains a violation may each be charged with a separate offense.

**165.25 INJUNCTION; MANDAMUS.** If any building or structure is erected, constructed, reconstructed, altered or repaired, or land is used in violation of this chapter, the City may, in addition to other remedies, institute injunction, mandamus or other appropriate lawful action necessary to prevent, correct or abate such violation.

**165.26 CONSTRUCTION COMPLIANCE CERTIFICATE.** A construction compliance certificate shall be obtained from the administrative officer before any building or structure shall be erected, reconstructed or structurally altered to increase the exterior dimensions, height or floor area, or remodeled to increase the number of dwelling units or accommodate a change in use of the building and/or premises or part thereof. The construction compliance certificate shall state that the proposed construction complies with all provisions of this chapter, and no subsequent modifications shall be made to plans or to actual construction that would be in violation of this chapter.

**165.27 OCCUPANCY COMPLIANCE CERTIFICATE.** No change in the use or occupancy of land or change in use or occupancy in an existing building, other than for single-family dwelling purposes, shall be made, nor shall any new building be occupied for any purpose other than a single-family dwelling until an occupancy compliance certificate has been issued by the administrative officer. Every occupancy compliance certificate shall state that the new occupancy complies with all provisions of this chapter, and no subsequent modification shall be made to the occupancy, use or method of operation that would be in violation of this chapter.

**165.28 FEES.** The administrative officer is directed to issue a construction compliance certificate and/or an occupancy compliance certificate as required by this chapter for proposed construction, reconstruction or alteration which complies with all provisions contained herein and to charge a fee of \$25.00 for each construction compliance certificate or occupancy compliance certificate issued separately. Only one \$25.00 fee shall be charged for a construction compliance certificate and occupancy compliance certificate issued jointly. There shall be no fees charged to the United States Government, the State of Iowa, or any political subdivision thereof. All fees shall be paid to the administrative officer, who shall keep a complete and accurate record of fees received and shall forthwith deposit them to the credit of the General Fund of the City. *(Ord. 294 – Feb. 19 Supp.)*

**165.29 BOARD OF ADJUSTMENT CREATED.** A Board of Adjustment is hereby established. The board shall consist of five (5) members to be appointed by the Council for overlapping terms of five (5) years. Members of the Board of Adjustment may be removed from office by the Council for cause upon written charges and after public hearing. Vacancies shall be filled by the Council for the unexpired term of the member.

**165.30 PROCEEDINGS OF THE BOARD OF ADJUSTMENT.** The Board of Adjustment shall adopt rules necessary to the conduct of its affairs and in keeping with the provisions of this chapter. Meetings shall be held at the call of the Chairperson and at such other times as the Board may determine. The Chairperson, or in the absence of the Chairperson, the acting Chairperson may administer oaths and compel attendance of witnesses. All meetings shall be open to the public. The Board shall keep minutes of its proceedings showing the vote of each member upon each question, or if absent or failing to vote indicating such fact, and shall keep records of its examinations and other official actions, all of which shall be public record and be immediately filed in the office of the Board.

**165.31 HEARINGS, APPEALS AND NOTICE.** Appeals to the Board of Adjustment concerning interpretation or administration of this chapter may be

taken by any person aggrieved or by any officer or bureau of the governing body of the City affected by a decision of the administrative officer. Such appeals shall be taken within a reasonable time not to exceed sixty (60) days by filing with the administrative officer and with the Board of Adjustment a notice of appeal specifying the grounds thereof. The administrative officer shall forthwith transmit to the Board all papers constituting the record upon which the action appealed from was taken. The Board of Adjustment shall fix a reasonable time for the hearing of appeal, give public notice thereof, as well as due notice to the parties in interest, and decide the same within a reasonable time. At the hearing, any party may appear in person or by agent or attorney.

**165.32 APPEAL FEE.** A fee of twenty-five dollars (\$25.00) shall be paid to the administrative officer at the time the notice of appeal is filed, which the administrative officer shall forthwith pay over to the credit of the General Fund of the City.

**165.33 STAY OF PROCEEDINGS.** An appeal stays all proceedings in furtherance of the action appealed from, unless the administrative officer from whom the appeal is taken certifies to the Board after the notice of appeal is filed with the administrative officer, that by reason of facts stated in the certificate, a stay would in the opinion of the administrative officer cause imminent peril to life and property. In such case, proceedings shall not be stayed other than by a restraining order which may be granted by the board or by a court of record on application, on notice to the administrative officer from whom the appeal is taken and on due cause shown.

**165.34 POWERS AND DUTIES OF THE BOARD OF ADJUSTMENT.** The Board of Adjustment shall have the following powers and duties:

1. Administrative Review. To hear and decide appeals where it is alleged that there is error in any order, requirement, decision or determination made by the administrative officer in the enforcement of this chapter.
2. Special Exceptions – Conditions Governing Applications; Procedures. To hear and decide only such special exceptions as the Board of Adjustment is specifically authorized to pass on by the terms of this chapter; to decide such questions as are involved in determining whether special exceptions should be granted; and to grant special exceptions with such conditions and safeguards as are appropriate under this chapter, and to deny special exceptions when not in harmony with the purpose and intent of this chapter. A special exception shall not be granted by the board unless and until:

- A. A written application for a special exception has been submitted indicating the section of this chapter under which the special exception is sought and stating the grounds on which it is requested.
- B. Notice shall have been given at least fifteen (15) days in advance of the public hearing by publication in a newspaper of general circulation in the City.
- C. The public hearing shall be held, at which time any party may appear in person or by agent or attorney.
- D. The Board shall have made a finding that it is empowered under the section of this chapter described in the application to grant the special exception, and that the granting of the special exception will not adversely affect the public interest.

In granting any special exception, the Board may prescribe appropriate conditions and safeguards in conformity with this chapter. Violation of such conditions and safeguards, when made a part of the terms under which the special exception is granted, shall be deemed a violation of this chapter. The Board shall prescribe a time limit within which the action for which the special exception is required shall be begun or completed, or both. Failure to begin or complete, or both, such action within the time limit set shall void the special exception.

3. Variances – Conditions Governing Applications; Procedures. To authorize upon appeal in specific cases such variance from the terms of this chapter as will not be contrary to the public interest where, owing to the special conditions, a literal enforcement of the provisions of this chapter would result in unnecessary hardship. A variance from the terms of this chapter shall not be granted by the board unless and until:

- A. A written application for a variance shall have been submitted demonstrating that:
  - (1) Special conditions and circumstances exist which are peculiar to the land, structure or building involved, and which are not applicable to other lands, structures or buildings in the same district.
  - (2) Literal interpretation of the provisions of this chapter would deprive the applicant of rights commonly enjoyed by other properties in the same district under the terms of this chapter.
  - (3) The special conditions and circumstances do not result from the actions of the applicant.

- (4) Granting the variance requested will not confer on the applicant any special privilege that is denied by this chapter to other lands, structures or buildings in the same district. No nonconforming use of neighboring lands, structures or buildings in the same district and no permitted use of land, structures or buildings in other districts shall be considered grounds for the issuance of a variance.
- B. Notice of public hearing shall have been given as in subsection 2(B) of this section.
- C. The public hearing shall be held, at which time any party may appear in person, or by agent or by attorney.
- D. The Board shall have made findings that the requirements of subsection 3(A) of this section have been met by the applicant for a variance.
- E. The Board shall further have made a finding that the reasons set forth in the application justify the granting of the variance, and that the variance is the minimum variance that will make possible the reasonable use of the land, building or structure.
- F. The Board shall further have made a finding that the granting of the variance will be in harmony with the general purpose and intent of this chapter, and will not be injurious to the neighborhood or otherwise detrimental to the public welfare.

**165.35 CONDITIONS OF VARIANCE.** In granting any variance, the Board may prescribe appropriate conditions and safeguards in conformity with this chapter. Violations of such conditions and safeguards, when made a part of the terms under which the variance is granted, shall be deemed a violation of this chapter. Under no circumstances shall the Board grant a variance to allow a use not permissible under the terms of this chapter in the district involved, or any use expressly or by implication prohibited by the terms of this chapter in said district.

**165.36 DECISIONS OF THE BOARD OF ADJUSTMENT.** In exercising the above-mentioned powers, the Board may, so long as such action is in conformity with the terms of this chapter, reverse or affirm, wholly or partly, or may modify the order, requirement, decision or determination as ought to be made and to that end shall have the powers of the administrative officer from whom the appeal is taken. The concurring vote of three members of the Board shall be necessary to reverse any order, requirement, decision or determination of the administrative officer, or to decide in favor of the applicant on any matter

upon which it is required to pass under this chapter, or to effect any variation in application of this chapter.

**165.37 APPEALS FROM THE BOARD OF ADJUSTMENT.** Any person or persons or any board, taxpayer, department, board or bureau of the City aggrieved by any decision of the Board of Adjustment may seek review of such decision of the Board by a court of record in the manner provided by the laws of the state and particularly by Chapter 414, Code of Iowa.

**165.38 CHANGES AND AMENDMENTS.** The regulations imposed and the districts created by this chapter may be amended from time to time by the Council, but no such amendment shall be made without public hearing before said Council and without a report made upon the amendment by the Planning and Zoning Commission. Notice of the time and place of such hearing shall be published in a newspaper having general circulation in the City at least once, not less than seven (7) days nor more than twenty (20) days before the public hearing and in no case shall the public hearing be held earlier than the next regularly scheduled Council meeting following the published notice. In case the Commission does not approve the change, or in the case of a protest filed with the Council against a change in district boundaries signed by the owners of twenty percent (20%) or more either of the area of the lots included in such proposed change or of those immediately adjacent thereto and within two hundred (200) feet of the boundaries thereof, such amendment shall not be passed except by the favorable vote of three-fourths ( $\frac{3}{4}$ ) of all the members of the Council.

**165.39 APPLICATION FOR CHANGE OF ZONING DISTRICT BOUNDARIES.** Any person may submit to the Council an application requesting a change in the zoning district boundaries as shown on the official zoning map. Such application shall be filed with the administrative officer accompanied by a fee of twenty-five dollars (\$25.00) and shall contain the following information.

1. The legal description and local address of the property.
2. The present zoning classification and the zoning classification requested for the property.
3. The existing use and proposed use of the property.
4. The names and addresses of the owners of all property within two hundred (200) feet of the property for which the change is requested.
5. A statement of the reasons why the applicant feels the present zoning classification is no longer valid.

6. A plat showing the locations, dimensions and use of the applicant's property and all property within two hundred (200) feet thereof, including streets, alleys and other physical features.

All fees shall be deposited to the General Revenue Fund of the City. Failure to approve the requested change shall not be deemed cause to refund the fee to the applicant.

**166.01 DEFINITIONS.** For the purpose of this chapter (which shall be known as and may be cited as “City of Mechanicsville Subdivision Regulations”) certain words used herein are defined as follows:

1. Subdivision. The term “subdivision” means the division of a parcel of land into three (3) or more lots or parcels for the purpose of transfer of ownership or building development, or, if a new street is involved, any division of a parcel of land, provided that a division of land for agricultural purposes into lots or parcels of five (5) acres or more and not involving a new street shall not be deemed a subdivision. The term includes resubdivision and, when appropriate to the context, shall relate to the process of subdividing or to the land subdivided.

2. Streets and Alleys. The term “street” means a way for vehicular traffic, whether designated as a street, highway, thoroughfare, parkway, throughway, road, avenue, boulevard, land, place or however otherwise designated.

A. Arterial streets and highways are those which are used primarily for fast or heavy traffic.

B. Collector streets are those which carry traffic from minor streets to the major system of arterial streets and highways, including the principal entrance streets of a residential development and streets for circulation within such a development.

C. Minor streets are those which are used primarily for access to the abutting properties.

D. Marginal access streets are minor streets which are parallel to and adjacent to arterial streets and highways; and which provide access to abutting properties and protection from through traffic.

E. Alleys are minor ways which are used primarily for vehicular service access to the back or the side of properties otherwise abutting on a street.

**166.02 PROCEDURE.** Chapter 354.9 of the Code of Iowa as it relates to Subdivisions is hereby specifically incorporated into Mechanicsville's Subdivision chapter as to unincorporated land within two miles of the corporate limits of the City. For the purpose of this chapter, the following procedures shall be followed:

1. Pre-application Procedure.
  - A. Previous to the filing of an application for conditional approval of the preliminary plat, the subdivider shall submit to the City's Planning and Zoning Commission (referred to herein as "the Commission") plans and data as specified in Section 166.05. This step does not require formal application, fee or filing of plat with the Commission.
  - B. Within fifteen (15) days the Commission shall inform the subdivider that the plans and data as submitted or as modified do or do not meet the objectives of these regulations. When the Commission finds the plans and data do not meet the objectives of these regulations, it shall express its reasons therefor.
2. Procedure for Conditional Approval of Preliminary Plat.
  - A. On reaching conclusions informally, as recommended in subsection (1)(A) above, regarding general program and objectives, the subdivider shall cause to be prepared a preliminary plat, together with improvement plans and other supplementary material as specified in Section 166.05.
  - B. Two (2) copies of the preliminary plat and supplementary material specified shall be submitted to the Commission with written application for conditional approval at least seven (7) days prior to the meeting at which it is to be considered.
  - C. Following (i) review of the preliminary plat and other material submitted for conformity thereof to these regulations and (ii) negotiations with the subdivider on changes deemed advisable and the kind and extent of improvements to be made by the subdivider, the Commission shall, within thirty (30) days, act thereon as submitted, or modified, and if approved, the Commission shall express its approval as conditional approval and state the conditions of such approval, if any, or if disapproved, shall express its disapproval and its reasons therefor.

D. The action of the Commission shall be noted on two (2) copies of the preliminary plat, referenced and attached to any conditions determined. One copy shall be returned to the subdivider and the other retained by the Commission.

E. Conditional approval of a preliminary plat shall not constitute approval of the final plat. Rather it shall be deemed as an expression of approval to the layout submitted on the preliminary plat as a guide to the preparation of the final plat which will be submitted for approval of the Commission and for recording upon fulfillment of the requirements of these regulations and the conditions of the conditional approval, if any.

3. Procedure for Approval of Final Plat:

A. The final plat shall conform substantially to the preliminary plat as approved, and, if desired by the subdivider, it may constitute only that portion of the approval preliminary plat which the subdivider proposes to record and develop at the time, provided, however, that such portion conforms to all requirements of the regulations.

B. Application for approval of the final plat shall be submitted in writing to the Commission at least seven (7) days prior to the meeting at which it is to be considered.

C. Two (2) copies of the final plat and other exhibits required for approval shall be prepared as specified in Section 166.05, and shall be submitted to the Commission within twelve (12) months after approval of the preliminary plat; otherwise such approval shall become null and void, unless an extension of time is applied for and granted by the Commission.

**166.03 DESIGN STANDARDS.** The following design standards apply to this chapter:

1. Streets.

A. The arrangement, character, extent, width, grade and location of all streets shall conform to the general community comprehensive plan and shall be considered in their relation to existing and planned streets, to topographical conditions, to public convenience and safety, and in their appropriate relation to the proposed used of the land to be served by such streets.

B. Where such is not shown in the general community comprehensive plan, the arrangement of streets in a subdivision shall either:

(1) Provide for the continuation or appropriate projection of existing principal streets in surrounding areas or

(2) Conform to a plan for the neighborhood approved or adopted by the Commission to meet a particular situation where topographical or other conditions make continuance or conformance to existing streets impracticable.

C. Minor streets shall be so laid out that their use by through traffic will be discouraged.

D. Where a subdivision abuts or contains an existing or proposed arterial street, the Commission may require marginal access streets, reverse frontage with screen planting contained in a nonaccess reservation along the rear property line, deep lots with rear service alleys or such other treatment as may be necessary for adequate protection of residential properties and to afford separation of through and local traffic.

E. Where a subdivision borders on or contains a railroad right-of-way or limited access highway right-of-way, the Commission may require a street approximately parallel to and on each side of such right-of-way, at a distance suitable for the appropriate use of the intervening land, as for park purposes in residential districts, or for commercial or industrial purposes in appropriate districts. Such distances shall also be determined with due regard for the requirements of approach grades and future grade separations.

F. Reserve strips controlling access to streets shall be prohibited except where their control is definitely placed in the City under conditions approved by the Commission.

G. Street jogs with centerline offsets of less than 125 feet shall be avoided.

H. A tangent at least 100 feet long shall be introduced between reverse curves on arterial and collector streets.

I. When connecting street lines deflect from each other at any one point by more than ten (10) degrees, they shall be connected by a curve with a radius adequate to insure a sight distance of not less than 100 feet for minor and collector streets and of such greater radii as the Commission shall determine for special cases.

J. Streets shall be laid out so as to intersect as nearly as possible at right angles and no street shall intersect any other street at less than 100 degrees.

K. Property lines at street intersections shall be rounded with a radius of ten feet or of a greater radius where the Commission may deem it necessary. The Commission may permit comparable cut-offs or chords in place of rounded corners.

L. Street right-of-way widths shall be not less than as follows:

Street Type	Right-of-way (Feet)
Arterial	80
Collector	60
Minor, for row houses and apartments	60
Minor, for other residences	50
Marginal access	40

M. Half streets shall be prohibited, except where essential to the reasonable development of the subdivision in conformity with the other requirements of these regulations; and where the Commission finds it will be practicable to require the dedication of the other half when the adjoining property is subdivided. Wherever a half street is adjacent to a tract to be subdivided, the other half of the street shall be platted within such tract.

N. Dead-end streets, designed to be so permanently, shall not be longer than 500 feet and shall be provided at the closed end with a turnaround having an outside roadway diameter of at least 80 feet and a street property line diameter of at least 100 feet.

O. No street names shall be used which will duplicate or be confused with the names of existing streets. Street names shall be subject to the approval of the Commission.

P. Street grades, wherever feasible, shall not exceed the following, with due allowance for reasonable vertical curves:

Street Type	Grade Percent
Arterial	6%
Collector	6%
Minor	8%
Marginal access	8%

Q. No street grade shall be less than four percent (4%).

2. Alleys.

A. Alleys shall be provided in commercial and industrial districts, except that the Commission may waive this requirement where other definite and assured provision is made for service access, such as off-street loading, unloading and parking consistent with and adequate for the uses proposed.

B. The width of an alley shall be 20 feet.

C. Alley intersections and sharp changes in corners shall be cut off sufficiently to permit safe vehicular movement.

D. Dead-end alleys shall be avoided where possible, but if unavoidable, shall be provided with adequate turnaround facilities at the dead end, as determined by the Commission.

3. Easements.

A. Easements across lots or centered on rear or side lot lines shall be provided for utilities where necessary and shall be at least twelve (12) feet wide.

B. Where a subdivision is traversed by a water course, drainage way, channel or stream, there shall be provided a storm water easement or drainage right-of-way conforming substantially with the lines of such water course, and such further width or construction, or both, as will be adequate for the purpose. Parallel streets or parkways may be required in connection therewith.

4. Blocks.

A. The lengths, widths and shapes of blocks shall be determined with due regard to:

- (1) Provision of adequate building sites suitable to the special needs of the type of use contemplated.
- (2) Zoning requirements as to lot sizes and dimensions.

- (3) Needs for convenient access, circulation, control and safety of street traffic.
    - (4) Limitations and opportunities of topography.
  - B. Block lengths shall not exceed 1800 feet, or be less than 300 feet.
  - C. Pedestrian crosswalks, not less than 10 feet wide, shall be required where deemed essential to provide circulation or access to schools, playgrounds, shopping centers, transportation and other community facilities.
- 5. Lots.
  - A. The lot size, width, depth, shape and orientation and the minimum building setback lines shall be appropriate for the location of the subdivision and for the type of development and use contemplated.
  - B. Lot dimensions shall conform to the requirements of the zoning ordinance, and
    - (1) Residential lots where not served by public sewer shall not be less than 125 feet wide or less than 20,000 square feet in area.
    - (2) Depth and width of properties reserved or laid out for commercial and industrial purposes shall be adequate to provide for the off-street service and parking facilities required by the type of use and development contemplated.
  - C. Corner lots for residential use shall have extra width to permit appropriate building setback from and orientation to both streets.
  - D. The subdividing of the land shall be such as to provide, by means of a public street, each lot with satisfactory access to an existing public street.
  - E. Double frontage and reverse frontage lots should be avoided except where essential to provide separation of residential development from traffic arteries or to overcome specific disadvantages of topography and orientation. A planting screen easement of at least ten (10) feet and across which there shall be no right of access, shall be provided along the line of lots abutting such a traffic artery or other disadvantageous use.
  - F. Side lots lines shall be substantially at right angles or radial to street lines.

6. Public Sites and Open Spaces.
  - A. Where a proposed park, playground, school or other public use shown in a general community comprehensive plan is located in whole or in part in a subdivision, the Commission may require the dedication or reservation of such area within the subdivision in those cases in which the Commission deems such requirements to be reasonable.
  - B. Where deemed essential by the Commission, upon consideration of a particular type of development proposed in the subdivision and especially in large-scale neighborhood unit developments not anticipated in the general community comprehensive plan, the Commission may require the dedication or reservation of such other areas or sites of a character, extent and location suitable to the needs created by such development for schools, parks and other neighborhood purposes.

**166.04 REQUIRED IMPROVEMENTS.** The following improvements are required for subdivision development:

1. Monuments. Monuments shall be placed at all block corners, angle points, points of curves in streets and at intermediate points as shall be required by the City Engineer. The monuments shall be of such material, size and length as may be approved by the City Engineer.
2. Utility and Street Improvements. Utility and street improvements shall be provided in each new subdivision in accordance with the standards and requirements described as follows:
  - A. Water mains shall be installed by the subdivider at the subdivider's expense in accordance with State regulations and stubbed into each lot line with a shut-off valve installed at the end of the stub. Construction must be under the supervision of the City Engineer and approved by the City Engineer to the Council in writing. Plans for water mains shall be prepared by a licensed engineer and shall be approved by the Council. In-place plans must be filed with the Clerk before final approval is given.
  - B. Sanitary sewer mains shall be installed at the subdivider's expense in accordance with City and State regulations and shall be stubbed into each lot at the time of installation of the sewer mains. Sanitary sewer will be installed in the center of the street as near as practical with manholes at each intersection, but in no case shall manholes be more than 400 feet apart. Plans and specifications for sanitary sewer shall be prepared by a licensed engineer and shall be approved by the Council.

- C. Arterial streets shall be approved by the Council.
- D. Collector streets shall be a minimum of 41 foot roadway.
- E. Minor streets shall be a minimum of 37 foot roadway.
- F. Curb and gutter shall be installed at the subdivider's expense according to plans and specifications prepared by a licensed engineer and approved by the Council.
- G. All streets shall be constructed to grade and surfaced with crushed rock and asphalt or concrete at the subdivider's expense.
- H. Alleys shall be constructed to grade and surfaced full width with three (3) inches of crushed rock at the subdivider's expense in accordance with plans and specifications prepared by a licensed engineer and approved by the Council.
- I. Sidewalks, when installed, shall meet City specifications.
- J. Street trees may be planted in parking according to City specifications.

**166.05 PLATS AND DATA.** The following plat and data regulations shall apply:

1. Pre-application Plans and Data:
  - A. General subdivision information shall describe or outline the existing conditions of the site and the proposed development as necessary to supplement the drawings required below. This information may include data on existing covenants, land characteristics, and available community facilities and utilities; and information describing the subdivision proposal such as number of residential lots, typical lot width and depth, price range, business areas, playgrounds, park areas and other public areas, proposed protective covenants and proposed utilities and street improvements.

- E. Other certificates, affidavits, endorsements or deductions as may be required by Chapter 354 of the Code of Iowa or by the Commission in the enforcement of these regulations.

**166.06 VARIANCES.** The following variances may be allowed according to the specifications:

1. **Hardship.** Where the Commission finds that extraordinary hardships may result from strict compliance with these regulations, it may vary the regulations so that substantial justice may be done and the public interest served, provided that such variation will not have the effect of nullifying the intent and purpose of the general community comprehensive plan or these regulations.
2. **Large Scale Development.** The standards and requirements of these regulations may be modified by the Commission in the case of a plan and program for a new town, a complete community or a neighborhood unit which in the judgment of the Commission provides adequate public spaces and improvements for the circulation, recreation, light, air and service needs of the tract when fully developed and populated, and which also provides such covenants and other legal provisions as will assure conformity to and achievement of the plan.
3. **Conditions.** In granting variances and modifications, the Commission may require such conditions as will, in its judgment, secure substantially the objectives of the standards and requirements so varied or modified.

**166.07 PENALTIES.** Whoever, being the owner or agent of the owner of any land located within and adjacent to the City, knowingly or with intent to defraud, transfers or sells by reference to an exhibition of or by other use of a plat of subdivision of such land before the final plat has been approved by the Commission, shall forfeit and pay the penalty of not more than one hundred dollars (\$100.00) for each lot so transferred or sold or agreed or negotiated to be sold and a description by metes and bounds shall not exempt the transaction from such penalties. Each day that a violation is permitted to exist constitutes a separate offense.

### 167.01 STATUTORY AUTHORITY, FINDINGS OF FACT AND PURPOSE.

1. The Legislature of the State of Iowa has in Chapter 414, Code of Iowa, as amended, delegated the power to cities to enact zoning regulations to secure safety from flood and to promote health and the general welfare.
2. Findings of Fact.
  - A. The flood hazard areas of the City of Mechanicsville are subject to periodic inundation which can result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base all of which adversely affect the public health, safety and general welfare of the community.
  - B. These flood losses, hazards, and related adverse effects are caused by: (i) The occupancy of flood hazard areas by uses vulnerable to flood damages which create hazardous conditions as a result of being inadequately elevated or otherwise protected from flooding and (ii) the cumulative effect of obstructions on the floodplain causing increases in flood heights and velocities.
3. Statement of Purpose. It is the purpose of this chapter to protect and preserve the rights, privileges and property of the City of Mechanicsville and its residents and to preserve and improve the peace, safety, health, welfare, and comfort and convenience of its residents by minimizing those flood losses described in Section 167.01(2)(A) of this chapter with provisions designed to:
  - A. Restrict or prohibit uses which are dangerous to health, safety or property in times of flood or which cause excessive increases in flood heights or velocities.

- B. Require that uses vulnerable to floods, including public facilities which serve such uses, be protected against flood damage at the time of initial construction or substantial improvement.
- C. Protect individuals from buying lands which may not be suited for intended purposes because of flood hazard.
- D. Assure that eligibility is maintained for property owners in the community to purchase flood insurance through the National Flood Insurance Program.

#### **167.02 GENERAL PROVISIONS.**

1. **Lands to Which Chapter Apply.** The provisions of this chapter shall apply to all lands within the jurisdiction of the City of Mechanicsville which are located within the boundaries of the Floodplain (Overlay) District as established in Section 167.03.
2. **Rules for Interpretation of Floodplain (Overlay) District.** The boundaries of the Floodplain (Overlay) District areas shall be determined by scaling distances on the official Flood Insurance Rate Map. When an interpretation is needed as to the exact location of a boundary, the City Clerk shall make the necessary interpretation. The City Council shall hear and decide appeals when it is alleged that there is an error in any requirement, decision, or determination made by the City Clerk in the enforcement or administration of this chapter.
3. **Compliance.** No structure or land shall hereafter be used and no structure shall be located, extended, converted or structurally altered without full compliance with the terms of this chapter and other applicable regulations which apply to uses within the jurisdiction of this chapter.
4. **Abrogation and Greater Restrictions.** It is not intended by this chapter to repeal, abrogate or impair any existing easements, covenants, or deed restrictions. However, where this chapter imposes greater restrictions, the provision of this chapter shall prevail. All other ordinances inconsistent with this chapter are hereby repealed to the extent of the inconsistency only.
5. **Interpretation.** In their interpretation and application, the provisions of this chapter shall be held to be minimum requirements and shall be liberally construed in favor of the governing body and shall not be deemed a limitation or repeal of any other powers granted by State statutes.

6. Warning and Disclaimer of Liability. The standards required by this chapter are considered reasonable for regulatory purposes. This chapter does not imply that areas outside the designated Floodplain (Overlay) District areas will be free from flooding or flood damages. This chapter shall not create liability on the part of the City of Mechanicsville or any officer or employee thereof for any flood damages that result from reliance on this chapter or any administrative decision lawfully made there under.

7. Severability. If any section, clause, provision or portion of this chapter is adjudged unconstitutional or invalid by a court of competent jurisdiction, the remainder of this chapter shall not be affected thereby.

**167.03 ESTABLISHMENT OF FLOODPLAIN (OVERLAY) DISTRICT.** The areas within the jurisdiction of the City of Mechanicsville having special flood hazards are hereby designated as a Floodplain (Overlay) District and shall be subject to the standards of the Floodplain (Overlay) District (as well as those for the underlying zoning district). The Floodplain (Overlay) District boundaries shall be as shown on the Flood Insurance Rate Map (FIRM) for Cedar County and Incorporated Areas, City of Mechanicsville, Panels 19031C0025C, 0050C, dated August 19, 2013.

**167.04 STANDARDS FOR FLOODPLAIN (OVERLAY) DISTRICT.** All uses must be consistent with the need to minimize flood damage and meet the following applicable performance standards. Where 100-year flood elevations and floodway data have not been provided on the Flood Insurance Rate Map, the Iowa Department of Natural Resources shall be contacted to compute such data. The applicant will be responsible for providing the Department of Natural Resources with sufficient technical information to make such determination.

1. All Development Within the Floodplain (Overlay) District shall:
  - A. Be consistent with the need to minimize flood damage.
  - B. Use construction methods and practices that will minimize flood damage.
  - C. Use construction materials and utility equipment that are resistant to flood damage.
  - D. Obtain all other necessary permits from federal, state and local governmental agencies including approval when required from the Iowa Department of Natural Resources.
2. Residential Buildings - All new or substantially improved residential structures shall have the lowest floor, including basement,

elevated a minimum of one (1) foot above the 100-year flood level. Construction shall be upon compacted fill which shall, at all points, be no lower than 1.0 ft. above the 100-year flood level and extend at such elevation at least 18 feet beyond the limits of any structure erected thereon. Alternate methods of elevating (such as piers) may be allowed subject to favorable consideration by the Board of Adjustment, where existing topography, street grades, or other factors preclude elevating by fill. In such cases, the methods used must be adequate to support the structure as well as withstand the various forces and hazards associated with flooding. All new residential structures shall be provided with a means of access which will be passable by wheeled vehicles during the 100-year flood.

3. Non-residential Buildings - All new or substantially improved non-residential buildings shall have the lowest floor (including basement) elevated a minimum of one (1) foot above the 100-year flood level, or together with attendant utility and sanitary systems, be floodproofed to such a level. When floodproofing is utilized, a professional engineer registered in the State of Iowa shall certify that the floodproofing methods used are adequate to withstand the flood depths, pressures, velocities, impact and uplift forces and other factors associated with the 100-year flood; and that the structure, below the 100-year flood level is watertight with walls substantially impermeable to the passage of water. A record of the certification indicating the specific elevation (in relation to North American Vertical Datum 1988) to which any structures are floodproofed shall be maintained by the Administrator.

4. All New and Substantially Improved Structures:

A. Fully enclosed areas below the "lowest floor" (not including basements) that are subject to flooding shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must either be certified by a registered professional engineer or meet or exceed the following minimum criteria:

- (1) A minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided.
- (2) The bottom of all openings shall be no higher than one foot above grade.

(3) Openings may be equipped with screens, louvers, valves, or other coverings or devices provided they permit the automatic entry and exit of floodwaters.

Such areas shall be used solely for parking of vehicles, building access and low damage potential storage.

B. New and substantially improved structures must be designed (or modified) and adequately anchored to prevent flotation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy.

C. New and substantially improved structures must be constructed with electrical, heating, ventilation, plumbing, and air conditioning equipment and other service facilities that are designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding.

5. Factory-built Homes:

A. All factory-built homes, including those placed in existing factory-built home parks or subdivisions, shall be elevated on a permanent foundation such that the lowest floor of the structure is a minimum of one (1) foot above the 100-year flood level.

B. All factory-built homes, including those placed in existing factory-built home parks or subdivisions, shall be anchored to resist flotation, collapse, or lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors.

6. Utility and Sanitary Systems:

A. On-site waste disposal and water supply systems shall be located or designed to avoid impairment to the system or contamination from the system during flooding.

B. All new and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of flood waters into the system as well as the discharge of effluent into flood waters. Wastewater treatment facilities (other than on-site systems) shall be provided with a level of flood protection equal to or greater than one (1) foot above the 100-year flood elevation.

C. New or replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the system. Water supply treatment facilities (other than on-site

systems) shall be provided with a level of protection equal to or greater than one (1) foot above the 100-year flood elevation.

D. Utilities such as gas or electrical systems shall be located and constructed to minimize or eliminate flood damage to the system and the risk associated with such flood damaged or impaired systems.

7. Storage of materials and equipment that are flammable, explosive or injurious to human, animal or plant life is prohibited unless elevated a minimum of one (1) foot above the 100-year flood level. Other material and equipment must either be similarly elevated or (i) not be subject to major flood damage and be anchored to prevent movement due to flood waters or (ii) be readily removable from the area within the time available after flood warning.

8. Flood control structural works such as levees, flood walls, etc. shall provide, at a minimum, protection from a 100-year flood with a minimum of 3 ft. of design freeboard and shall provide for adequate interior drainage. In addition, structural flood control works shall be approved by the Department of Natural Resources.

9. Watercourse alterations or relocations must be designed to maintain the flood carrying capacity within the altered or relocated portion. In addition, such alterations or relocations must be approved by the Department of Natural Resources.

10. Subdivisions (including factory-built home parks and subdivisions) shall be consistent with the need to minimize flood damages and shall have adequate drainage provided to reduce exposure to flood damage. Development associated with subdivision proposals (including the installation of public utilities) shall meet the applicable performance standards of this chapter. Subdivision proposals intended for residential use shall provide all lots with a means of access which will be passable by wheeled vehicles during the 100-year flood. Proposals for subdivisions greater than five (5) acres or fifty (50) lots (whichever is less) shall include 100-year flood elevation data for those areas located within the Floodplain (Overlay) District.

11. Accessory Structures:

A. Detached garages, sheds, and similar structures accessory to a residential use are exempt from the 100-year flood elevation requirements where the following criteria are satisfied.

(1) The structure shall not be used for human habitation.

- (2) The structure shall be designed to have low flood damage potential.
    - (3) The structure shall be constructed and placed on the building site so as to offer minimum resistance to the flow of floodwaters.
    - (4) The structure shall be firmly anchored to prevent flotation which may result in damage to other structures.
    - (5) The structure's service facilities such as electrical and heating equipment shall be elevated or floodproofed to at least one foot above the 100-year flood level.
  - B. Exemption from the 100-year flood elevation requirements for such a structure may result in increased premium rates for flood insurance coverage of the structure and its contents.
12. Recreational Vehicles:
- A. Recreational vehicles are exempt from the requirements of subsection 5 (factory-built homes) of this section regarding anchoring and elevation of factory-built homes when the following criteria are satisfied.
    - (1) The recreational vehicle shall be located on the site for less than 180 consecutive days, and,
    - (2) The recreational vehicle must be fully licensed and ready for highway use. A recreational vehicle is ready for highway use if it is on its wheels or jacking system and is attached to the site only by quick disconnect type utilities and security devices and has no permanently attached additions.
  - B. Recreational vehicles that are located on the site for more than 180 consecutive days or are not ready for highway use must satisfy requirements of subsection 5 (factory-built homes) of this section regarding anchoring and elevation of factory-built homes.
13. Pipeline river and stream crossings shall be buried in the streambed and banks, or otherwise sufficiently protected to prevent rupture due to channel degradation and meandering.

#### **167.05 ADMINISTRATION.**

1. Appointment, Duties and Responsibilities of City Clerk.

A. The City Clerk is hereby appointed to implement and administer the provisions of this chapter and will herein be referred to as the Administrator.

B. Duties of the Administrator shall include, but not necessarily be limited to the following:

(1) Review all floodplain development permit applications to assure that the provisions of this chapter will be satisfied.

(2) Review floodplain development applications to assure that all necessary permits have been obtained from federal, state and local governmental agencies including approval when required from the Department of Natural Resources for floodplain construction.

(3) Record and maintain a record of the elevation (in relation to North American Vertical Datum 1988) of the lowest floor (including basement) of all new or substantially improved structures in the Floodplain (Overlay) District.

(4) Record and maintain a record of the elevation (in relation to North American Vertical Datum 1988) to which all new or substantially improved structures have been floodproofed.

(5) Notify adjacent communities/counties and the Department of Natural Resources prior to any proposed alteration or relocation of a watercourse and submit evidence of such notifications to the Federal Emergency Management Agency.

(6) Keep a record of all permits, appeals and such other transactions and correspondence pertaining to the administration of this chapter.

2. Floodplain Development Permit.

A. Permit Required - A Floodplain Development Permit issued by the Administrator shall be secured prior to any floodplain development (any man-made change to improved and unimproved real estate, including but not limited to buildings or other structures, mining, filling, grading, paving, excavation or drilling operations), including the placement of factory-built homes.

B. Application for Permit - Application shall be made on forms furnished by the Administrator and shall include the following:

- (1) Description of the work to be covered by the permit for which application is to be made.
- (2) Description of the land on which the proposed work is to be done (i.e., lot, block, track, street address or similar description) that will readily identify and locate the work to be done.
- (3) Indication of the use or occupancy for which the proposed work is intended.
- (4) Elevation of the 100-year flood.
- (5) Elevation (in relation to North American Vertical Datum 1988) of the lowest floor (including basement) of buildings or of the level to which a building is to be floodproofed.
- (6) For buildings being improved or rebuilt, the estimated cost of improvements and market value of the building prior to the improvements.
- (7) Such other information as the Administrator deems reasonably necessary (e.g., drawings or a site plan) for the purpose of this chapter.

C. Action on Permit Application - The Administrator shall, within a reasonable time, make a determination as to whether the proposed floodplain development meets the applicable standards of this chapter and shall approve or disapprove the application. For disapprovals, the applicant shall be informed, in writing, of the specific reasons therefore. The Administrator shall not issue permits for variances except as directed by the City Board of Adjustment.

D. Construction and Use to be as Provided in Application and Plans - Floodplain Development Permits based on the basis of approved plans and applications authorize only the use, arrangement, and construction set forth in such approved plans and applications and no other use, arrangement or construction. Any use, arrangement, or construction at variance with that authorized shall be deemed a violation of this chapter. The applicant shall be required to submit certification by a professional engineer or land surveyor, as appropriate, registered

in the State of Iowa, that the finished fill, building floor elevations, floodproofing, or other flood protection measures were accomplished in compliance with the provisions of this chapter, prior to the use or occupancy of any structure.

3. Variance.

A. The City Council may authorize upon request in specific cases such variances from the terms of this chapter that will not be contrary to the public interest where, owing to special conditions, a literal enforcement of the provisions of this chapter will result in unnecessary hardship. Variances granted must meet the following applicable standards.

(1) Variances shall only be granted upon: (i) a showing of good and sufficient cause, (ii) a determination that failure to grant the variance would result in exceptional hardship to the applicant, and (iii) a determination that the granting of the variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public or conflict with existing local codes or ordinances.

(2) Variances shall only be granted upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.

(3) In cases where the variance involves a lower level of flood protection for buildings than what is ordinarily required by this chapter, the applicant shall be notified in writing over the signature of the Administrator that: (i) the issuance of a variance will result in increased premium rates for flood insurance up to amounts as high as \$25 for \$100 of insurance coverage and (ii) such construction increases risks to life and property.

B. Factors Upon Which the Decision of the City Council Shall be Based - In passing upon applications for Variances, the Board shall consider all relevant factors specified in other sections of this chapter and:

(1) The danger to life and property due to increased flood heights or velocities caused by encroachments.

(2) The danger that materials may be swept on to other land or downstream to the injury of others.

- (3) The proposed water supply and sanitation systems and the ability of these systems to prevent disease, contamination and unsanitary conditions.
- (4) The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner.
- (5) The importance of the services provided by the proposed facility to the City.
- (6) The requirements of the facility for a floodplain location.
- (7) The availability of alternative locations not subject to flooding for the proposed use.
- (8) The compatibility of the proposed use with existing development and development anticipated in the foreseeable future.
- (9) The relationship of the proposed use to the comprehensive plan and floodplain management program for the area.
- (10) The safety of access to the property in times of flood for ordinary and emergency vehicles.
- (11) The expected heights, velocity, duration, rate of rise and sediment transport of the flood water expected at the site.
- (12) The cost of providing governmental services during and after flood conditions, including maintenance and repair of public utilities (sewer, gas, electrical and water systems), facilities, streets and bridges.
- (13) Such other factors which are relevant to the purpose of this chapter.

C. Conditions Attached to Variances - Upon consideration of the factors listed above, the Board of Adjustment may attach such conditions to the granting of variances as it deems necessary to further the purpose of this chapter. Such conditions may include, but not necessarily be limited to:

- (1) Modification of waste disposal and water supply facilities.
- (2) Limitation of periods of use and operation.

- (3) Imposition of operational controls, sureties, and deed restrictions.
- (4) Requirements for construction of channel modifications, dikes, levees, and other protective measures, provided such are approved by the Department of Natural Resources and are deemed the only practical alternative to achieving the purpose of this chapter.
- (5) Floodproofing measures.

#### **167.06 NONCONFORMING USES.**

1. A structure or the use of a structure or premises which was lawful before the passage or amendment of this chapter, but which is not in conformity with the provisions of this chapter, may be continued subject to the following conditions:
  - A. If such use is discontinued for six (6) consecutive months, any future use of the building premises shall conform to this chapter.
  - B. Uses or adjuncts thereof that are or become nuisances shall not be entitled to continue as nonconforming uses.
2. If any nonconforming use or structure is destroyed by any means, including flood, it shall not be reconstructed if the cost is more than fifty (50) percent of the market value of the structure before the damage occurred, unless it is reconstructed in conformity with the provisions of this chapter. This limitation does not include the cost of any alteration to comply with existing state or local health, sanitary, building or safety codes or regulations or the cost of any alteration of a structure listed on the National Register of Historic Places, provided that the alteration shall not preclude its continued designation.

**167.07 PENALTIES FOR VIOLATION.** Violations of the provisions of this chapter or failure to comply with any of the requirements shall constitute a misdemeanor. Any person who violates this chapter or fails to comply with any of its requirements shall upon conviction thereof be fined not more than five hundred dollars (\$500.00) or imprisoned for not more than thirty (30) days. Nothing herein contained prevents the City of Mechanicsville from taking such other lawful action as is necessary to prevent or remedy violation.

**167.08 AMENDMENTS.** The regulations and standards set forth in this chapter may from time to time be amended, supplemented, changed, or repealed. No amendment, supplement, change, or modification shall be undertaken without prior approval of the Department of Natural Resources.

**167.09 DEFINITIONS.** Unless specifically defined below, words or phrases used in this chapter shall be interpreted so as to give them the meaning they have in common usage and to give this chapter its most reasonable application.

6. Expansion of Existing Factory-Built Home Park or Subdivision - The preparation of additional sites by the construction of facilities for servicing the lots on which the factory-built homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads).
7. Factory-Built Home - Any structure, designed for residential use, which is wholly or in substantial part, made, fabricated, formed or assembled in manufacturing facilities for installation or assembly and installation, on a building site. For the purpose of this chapter factory-built homes include mobile homes, manufactured homes, and modular homes; and also include "recreational vehicles" which are placed on a site for greater than 180 consecutive days and not fully licensed for and ready for highway use.

8. Factory-Built Home Park - A parcel or contiguous parcels of land divided into two or more factory-built home lots for sale or lease.

15. Floodway - The channel of a river or stream and those portions of the floodplains adjoining the channel, which are reasonably required to carry and discharge flood waters or flood flows so that confinement of flood flows to the floodway area will not cumulatively increase the water surface elevation of the base flood by more than one (1) foot.
16. Floodway Fringe - Those portions of the floodplain, other than the floodway, which can be filled, leveed, or otherwise obstructed without causing substantially higher flood levels or flow velocities.
17. Historic Structure - Any structure that is:
  - A. Listed individually in the National Register of Historic Places, maintained by the Department of Interior, or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing of the National Register;

  - D. The enclosed area is not a "basement" as defined in this section.

In cases where the lowest enclosed area satisfies criteria A, B, C, and D above, the lowest floor is the floor of the next highest enclosed area that does not satisfy the criteria above.

19. Minor Projects - Small development activities (except for filling, grading and excavating) valued at less than \$500.

24. Routine Maintenance of Existing Buildings and Facilities – Repairs necessary to keep a structure in a safe and habitable condition that do not trigger a building permit, provided they are not associated with a general improvement of the structure or repair of a damaged structure. Such repairs include:

A. Normal maintenance of structures such as re-roofing, replacing roofing tiles and replacing siding;

B. Exterior and interior painting, papering, tiling, carpeting, cabinets, counter tops and similar finish work;

C. Basement sealing;

D. Repairing or replacing damaged or broken window panes;

E. Repairing plumbing systems, electrical systems, heating or air conditioning systems and repairing wells or septic systems.

25. Special Flood Hazard Area - The land within a community subject to the "100-year flood". This land is identified as Zone A on the community's Flood Insurance Rate Map.

26. Start of Construction - Includes substantial improvement, and means the date the development permit was issued, provided the actual start of construction, repair, reconstruction, rehabilitation, addition, placement, or other improvement, was within 180 days of the permit date. The actual start means either the first placement or permanent

construction of a structure on a site, such as pouring of a slab or footings, the installation of pile, the construction of columns, or any work beyond the stage of excavation; or the placement of a factory-built home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers, or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings such as garages or sheds not occupied as dwelling units or not part of the main structure. For a substantial improvement, the actual start of construction means the first alteration of any wall, ceiling, floor, or other structural part of the building, whether or not that alteration affects the external dimensions of the building.

27. Structure - Anything constructed or erected on the ground or attached to the ground, including, but not limited to, buildings, factories, sheds, cabins, factor-built homes, storage tanks, and other similar uses.

28. Substantial Damage - Damage of any origin sustained by a structure whereby the cost of restoring the structure to its before damage condition would equal or exceed fifty (50) percent of the market value of the structure before the damage occurred.

29. Substantial Improvement - Any improvement to a structure which satisfies either of the following criteria:

A. Any repair, reconstruction, or improvement of a structure, the cost of which equals or exceeds fifty (50) percent of the market value of the structure either (i) before the "start of construction" of the improvement, or (ii) if the structure has been "substantially damaged" and is being restored, before the damage occurred. The term does not, however, include any project for improvement of a structure to correct existing violations of state or local health, sanitary, or safety code specifications which have been identified by the local code enforcement official and which are the minimum necessary to assure safe living conditions. The term also does not include any alteration of an "historic structure", provided the alteration will not preclude the structure's designation as an "historic structure".

B. Any addition which increases the original floor area of a building by 25 percent or more. All additions constructed after the first floodplain management regulations adopted by the community shall be added to any proposed addition in determining whether the total increase in original floor space would exceed 25 percent.

30. Variance - A grant of relief by a community from the terms of the floodplain management regulations.
31. Violation - The failure of a structure or other development to be fully compliant with the community's floodplain management regulations.
